

ECONOMIC OVERVIEW & INTEREST RATE VIEW

Provided by MUFG December 2025

The first half of 2025/26 saw:

- A 0.3% pick up in GDP for the period April to June 2025. More recently, the economy flatlined in July, with higher taxes for businesses restraining growth, but picked up to 0.1% m/m in August before falling back by 0.1% m/m in September.
- The 3m/yy rate of average earnings growth excluding bonuses has fallen from 5.5% to 4.6% in September.
- CPI inflation has ebbed and flowed but finished September at 3.8%, whilst core inflation eased to 3.5%.
- The Bank of England cut interest rates from 4.50% to 4.25% in May, and then to 4% in August (and subsequently to 3.75% in December).
- The 10-year gilt yield fluctuated between 4.4% and 4.8%, ending the half year at 4.70% (before falling back to 4.43% in early November).

MPC meetings: 8 May, 19 June, 7 August, 18 September, 6 November, 18 December 2025

There were six Monetary Policy Committee (MPC) meetings held between April and December. In May, the Committee cut Bank Rate from 4.50% to 4.25%, while in June policy was left unchanged. In June's vote, three MPC members (Dhingra, Ramsden and Taylor) voted for an immediate cut to 4.00%, citing loosening labour market conditions. The other six members were more cautious, as they highlighted the need to monitor for "signs of weak demand", "supply-side constraints" and higher "inflation expectations", mainly from rising food prices. By repeating the well-used phrase "gradual and careful", the MPC continued to suggest that rates would be reduced further.

In August, a further rate cut was implemented. However, a 5-4 split vote for a rate cut to 4% laid bare the different views within the Monetary Policy Committee, with the accompanying commentary noting the decision was "finely balanced" and reiterating that future rate cuts would be undertaken "gradually and carefully". Ultimately, Governor Bailey was the casting vote for a rate cut but with the CPI measure of inflation expected to reach at least 4% later this year, the MPC was wary of making any further rate cuts until inflation begins its slow downwards trajectory back towards 2%.

With wages still rising by just below 5%, it was no surprise that the September meeting saw the MPC vote 7-2 for keeping rates at 4% (Dhingra and Taylor voted for a further 25bps reduction). Moreover, the Bank also took the opportunity to announce that they would only shrink its balance sheet by £70bn over the next 12 months, rather than £100bn. The repetition of the phrase that "a gradual and careful" approach to rate cuts is appropriate suggested the Bank still thought interest rates will fall further.

At the 6 November meeting, Governor Bailey was once again the deciding vote, keeping Bank Rate at 4% but hinting strongly that a further rate cut was imminent if data supported such a move. By 18 December, with November CPI inflation having fallen to 3.2%, and with Q2 GDP revised down from 0.3% q/q to only 0.2% q/q, and Q3 GDP stalling at 0.1%, the MPC voted by 5-4 to cut rates further to 3.75%. However, Governor Bailey made it clear that any further reductions would require strong supporting data, and the pace of any further decreases would be slow compared to recent months. The markets expect Bank Rate to next be cut in April.

Prospects for Interest Rates

The Authority has appointed MUFG Corporate Markets as its treasury advisor and part of their service is to assist the Authority to formulate a view on interest rates. MUFG Corporate Markets provided the following forecasts on 22 December 2025. These are forecasts for Bank Rate, average earnings and PWLB certainty rates, gilt yields plus 80 bps.

MUG Interest Rate View 22.12.25													
	Mar-26	Jun-26	Sep-26	Dec-26	Mar-27	Jun-27	Sep-27	Dec-27	Mar-28	Jun-28	Sep-28	Dec-28	Mar-29
BANK RATE	3.75	3.50	3.50	3.25	3.25	3.25	3.25	3.25	3.25	3.25	3.25	3.25	3.25
3 month ave earnings	3.80	3.50	3.50	3.30	3.30	3.30	3.30	3.30	3.30	3.30	3.30	3.30	3.30
6 month ave earnings	3.80	3.50	3.50	3.40	3.30	3.30	3.30	3.40	3.40	3.40	3.40	3.40	3.40
12 month ave earnings	3.90	3.60	3.60	3.50	3.40	3.50	3.50	3.50	3.50	3.50	3.60	3.60	3.60
5 yr PWLB	4.60	4.50	4.30	4.20	4.10	4.10	4.10	4.10	4.10	4.10	4.10	4.10	4.10
10 yr PWLB	5.20	5.00	4.90	4.80	4.80	4.70	4.70	4.70	4.70	4.60	4.60	4.60	4.70
25 yr PWLB	5.80	5.70	5.60	5.50	5.50	5.40	5.30	5.30	5.30	5.20	5.20	5.20	5.20
50 yr PWLB	5.60	5.50	5.40	5.30	5.30	5.20	5.10	5.10	5.10	5.00	5.10	5.00	5.00

Our last interest rate forecast update was undertaken on 11 August. Since then, a combination of tepid growth (0.2% q/q GDP for Q2 and 0.1% q/q GDP for Q3), falling inflation (currently CPI is 3.2%), and a November Budget that will place more pressure on the majority of households' income, has provided an opportunity for the Bank of England's Monetary Policy Committee to further reduce Bank Rate from 4% to 3.75% on 18 December.

Accordingly, the MUG Corporate Markets forecast has been revised to price in a rate cut in Q2 2026 to 3.5%, likely to take place in the wake of a significant fall in the CPI inflation reading from 3% in March to 2% in April (as forecast by Capital Economics), followed by a short lull through the summer whilst more data is garnered, and then a further rate cut to 3.25% in Q4.

As in August, nonetheless, threats to that central scenario abound. What if wage increases remain stubbornly high? There are, after all, several sectors of the domestic economy, including social care provision and the building/construction industries, where staff shortages remain severe. Moreover, by May 2026, following the local elections, we will have a better handle on whether or not the Starmer/Reeves team is going to see out the current Parliament or whether they face a Leadership challenge from within their own party. If so, how will gilt markets react to these variables...and will there be additional geo-political factors to also bake in, particularly the Fed's monetary policy decisions in 2026 and the ongoing battle to lower rates whilst inflation remains close to 3%.

Accordingly, our updated central forecast is made with several hefty caveats. We are confident, as we have been for some time, that our forecast for Bank Rate and the 5-year PWLB Certainty Rate is robust, and we have marginally brought forward the timing of the next rate cut(s). But for the 10-, 25- and 50-years part of the curve, the level of gilt issuance, and the timing of its placement, will be integral to achieving a benign trading environment. That is not a "given", and additionally, the inflation outlook and political factors domestically and, crucially, in the US, are also likely to hold sway. Matters should be clearer by June in the UK, but the US mid-term elections are scheduled for November.

Our revised PWLB rate forecasts are based on the Certainty Rate (the standard rate minus 20 bps) which has been accessible to most authorities since 1 November 2012. Please note, the lower Housing Revenue Account (HRA) PWLB rate started on 15 June 2023 for those authorities with an HRA (standard rate minus 60 bps) and is set to prevail until at least the end of March 2026. Hopefully, there will be a further extension to this discounted rate announced in January.

Money market yield forecasts are based on expected average earnings by local authorities for 3 to 12 months.

Gilt yields and PWLB rates

The overall longer-run trend is for gilt yields and PWLB rates to fall back over the timeline of our forecasts, but the risks to our forecasts are generally to the upsides. Our target borrowing rates are set two years forward (as we expect rates to fall back) and the current PWLB (certainty) borrowing rates are set out below: -

PWLB debt	Current borrowing rate as at 22.12.25 p.m.	Target borrowing rate now (end of Q4 2027)	Target borrowing rate previous (end of Q4 2027)
-----------	--	--	---

5 years	4.81%	4.10%	4.20%
10 years	5.39%	4.70%	4.70%
25 years	6.01%	5.30%	5.30%
50 years	5.78%	5.10%	5.10%

Borrowing advice: Our long-term (beyond 10 years) forecast for the neutral level of Bank Rate remains at 3.5%. As all PWLB certainty rates are still above this level, borrowing strategies will need to be reviewed in that context. Overall, better value can be obtained at the shorter end of the curve (<5 years PWLB maturity/<10 years PWLB EIP) and short-dated fixed LA to LA monies should also be considered. Temporary borrowing rates will, generally, fall in line with Bank Rate cuts.

Our suggested budgeted earnings rates for investments up to about three months' duration in each financial year are set out below.

Average earnings in each year	Now	Previously
2025/26 (residual)	3.80%	3.90%
2026/27	3.40%	3.60%
2027/28	3.30%	3.30%
2028/29	3.30%	3.50%
2029/30	3.50%	3.50%
Years 6 to 10	3.50%	3.50%
Years 10+	3.50%	3.50%

We will continue to monitor economic and market developments as they unfold. Typically, we formally review our forecasts following the quarterly release of the Bank of England's Monetary Policy Report but will consider our position on an ad hoc basis as required.

Our interest rate forecast for Bank Rate is in steps of 25 bps, whereas PWLB forecasts have been rounded to the nearest 10 bps and are central forecasts within bands of + / - 25 bps. Naturally, we continue to monitor events and will update our forecasts as and when appropriate.
