

Grants for Transport Projects

Are you a business, parish council, voluntary group, partnership or other not-for-profit organisation?

Are you working on a project to encourage people to travel sustainably to and around the South Downs National Park?

As part of the **South Downs National Park's Local Sustainable Transport Fund** project, small grants of between **£250** and **£15,000**, covering up to **75 percent** of a project's cost, are being offered through the **Sustainable Transport Solutions Fund** (STSF). These grants are to help residents and visitors discover another way to travel to and around the National Park.

To be eligible, projects must demonstrate an effective plan that encourages long-term changes in the way people travel. Plans must also demonstrate how projects will become financially independent in the longer term.

This is an exciting opportunity for communities to take up the challenge and develop their own projects which inspire and promote the use of buses, trains, walking and cycling by both visitors and the people who live here.

Examples projects include:

- cycle parking and cycle-friendly street furniture;
- small scale improvements to access for cyclists and walkers of all abilities;
- guided walking and cycling experiences, self guided walks and cycle routes maps;
- initiatives that provide access to a bicycle;
- update of leaflets/maps for visitor attractions;
- charging points for electric vehicles.
