

Findon Neighbourhood Development Plan 2016 - 2035

*Made by the South Downs National Park
Authority on 8 December 2016*

Foreword

Findon is a downland village, situated wholly within the South Downs National Park (SDNP).

The Findon Neighbourhood Development Plan (FNDP) aims to allow residents of Findon to have a say in all aspects of the future of the Parish, but more importantly wants local people to decide what changes should occur, rather than leaving such decisions to the Local Planning Authority except where necessary.

The Plan sets out a vision for the Parish over a 20-year period that reflects the wishes and aspirations of local people. The Plan sets objectives on key themes such as getting around, business, tourism, community, leisure, wellbeing, the natural environment and the protection and enhancement of the Parish and the Village in relation to future residential and commercial development whilst seeking to accommodate the opportunities for new housing and for economic progress.

1.0 Introduction

The Findon Neighbourhood Development Plan is a new type of planning document. It is part of the Government's new approach to planning, which gives communities the power to shape the neighbourhoods in which they live. This is set out in the Localism Act that came into effect in April 2012.

How the Neighbourhood Plan fits into the Planning System

Although the Government's intention is for local people to decide what goes on in their villages, Neighbourhood Plans must be in general conformity with higher level planning policy. Accordingly Neighbourhood Plans must be in line with the National Planning Policy Framework (NPPF) and be in general conformity with the strategic policies of, in our case the Arun Local Plan 2003.

The Plan gives local people a say in determining where new development should go and how they would like the Parish to develop over the next 20 years. Without the Plan, the SDNPA would continue to make these decisions on behalf of the people of Findon, and indeed the SDNPA will continue to play a significant role moving forward.

The Plan provides a vision for the future of the Parish, and sets out clear policies and objectives to realise these visions. These policies accord with higher level planning policy, principally the NPPF, the Arun District Local Plan 2003 and the South Downs National Park emerging Local Plan, as required by the Localism Act.

The Plan has been developed through extensive consultation with the people of Findon and others with an interest in the village. Details of the consultation process can be found on the Parish website findon.arun.gov.uk.

A Consultation Statement provides an overview of the consultation, demonstrating that it fully accords with the requirements of the Localism Act.

This consultation has included meeting the requirements of Regulation 14 of the Neighbourhood Planning (General) Regulations 2012. The Plan has been amended where appropriate in response to consultation comments.

1.1 Plan Preparation Process

The Neighbourhood Plan Area was designated in 2012.

Community involvement was an integral and important component of the process.

The overarching purpose of the Findon Neighbourhood Development Plan is to produce a clear, attractive and shared vision for the area, developed with local residents, community and business partners, which will coordinate the actions and investments of a range of partners, including the South Downs National Park Authority, over the next 20 year period.

The Findon Neighbourhood Development Plan (referred to hereafter as the Plan) provides a vision for the future of the Parish, and sets out clear policies, principles and objectives to realise this vision.

1.0 Introduction: continued

The aims of the Plan are as follows:

General

- To support the South Downs National Park Authority in their duty to enhance and conserve the natural beauty and cultural heritage of the South Downs and specifically the Parish and village of Findon;
- To promote and protect the downland village, whose location in the middle of the South Downs National Park makes it essential that any development does not detract from its special qualities. At present it is a place where walkers, horse riders and cyclists, both residents and visitors alike, are able to enjoy the services within the village and easy access to open countryside with an excellent network of bridleways and footpaths;
- To support the development of high quality, sustainable and successful neighbourhoods whilst nurturing and enhancing the lives of existing residents in the Parish of Findon;
- To identify the unique or distinctive physical and cultural assets of the Parish and to use these to shape the future environment and community.

Economy

- To encourage new businesses that can offer sustainable and rewarding jobs;
- To encourage the retention of existing businesses and their attendant employment opportunities.

Development

- To ensure that any development is appropriate in terms of design, sustainability, density, and other current planning issues;
- To review local housing need and the availability of sites within the built up area boundary to determine if future housing can be allocated without a review and extension of the current built up area boundary.

Social

- To continue to value and encourage the range of activities, social groups and community events where residents and visitors can come together to enjoy the facilities of this special place.

Environment

- To maintain and protect green spaces that enhance the lives of parishioners, that sustain local wildlife and that invoke a sense of rural living within the settlements;
- To sustain and safeguard agriculture in the Parish in tandem with improved rural access and recreational opportunities for residents.

Transport

- To seek to maintain and create improvements and greater choices in the network of public transport and non-vehicular transport routes to allow a genuine choice in transport options;
- To support pedestrians, cyclists and horse riders in using the village roads and country lanes without fear of speeding or inconsiderate vehicles.

1.0 Introduction: continued

1.2 Statement of Community Involvement

The purpose of the Neighbourhood Plan is to articulate the views and issues that are important to the residents of Findon and give those residents a voice in shaping the future of their community. In doing so, the plan encourages the local community to:-

- be more aware of the surroundings and meet local needs;
 - identify what features of the community they want to protect and enhance;
 - give the Parish Council greater support and a mandate for taking actions on their behalf;
- and
- identify initiatives and funding that can be delivered by the community itself.

The Plan will also support the Parish Council's work in influencing service providers such as the South Downs National Park Authority, Arun District Council, West Sussex County Council and other authorities whose decisions affect the Parish.

To achieve these goals the Parish Council has undertaken a program of consultation events which are detailed in the Consultation Statement.

To ensure that the plan is robust in its evidence base and compliant with emerging policy guidance consultation has been carried out with residents, businesses and stakeholders. The full description of all the surveys and events can be found in the Evidence Base.

1.3 How the Plan is organised

The plan is organised into the following sections;

Section 1.0 - Introduction; provides an introduction to the neighbourhood planning process and how the plans formulated.

Section 2.0 - Context; provides the evidence base and baseline conditions which support the planned proposals.

Section 3.0 - The Parish today

Section 4.0 - Vision and Core objectives

Section 5.0 - Neighbourhood Plan policies; this provides the criteria and framework upon which future development is judged on how the community should grow.

The Evidence Base

There is a large amount of background information that has helped in producing the Plan (known as the Evidence Base). Links to all relevant documents are available via the Parish Council website findon.arun.gov.uk/keydocuments

1.0 Introduction: continued

1.4 Regulations and the Emerging Local Plan

Neighbourhood Plans must be in line with European Regulations on strategic environmental assessment and habitat regulations. The SDNPA has confirmed that a strategic environmental assessment (SEA) for Findon is not required.

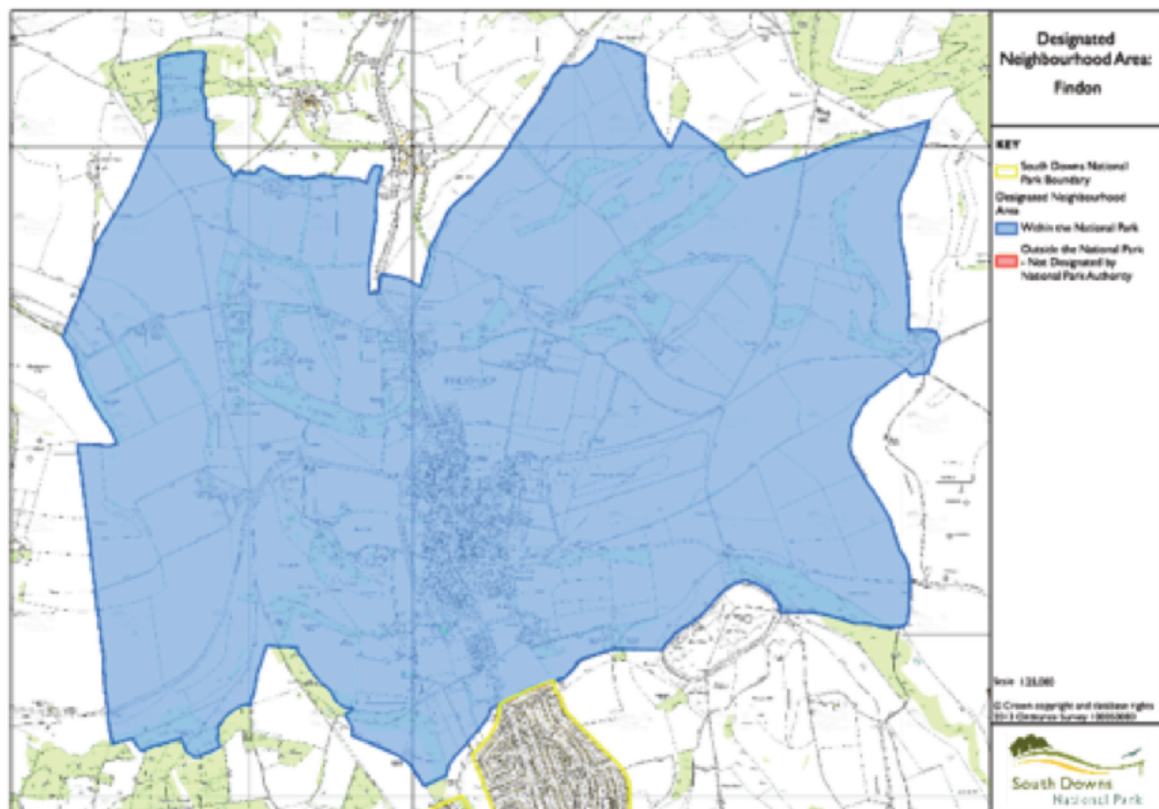

The Plan is the statutory Findon Neighbourhood Development Plan (FNDP) that covers the whole of the Findon Parish Neighbourhood Area as designated under the Neighbourhood Plan (General) Regulations 2012.

The whole of the Plan area lies within the South Downs National Park (SDNP). On 1st April 2011 the statutory responsibility for planning policy for the National Park area transferred from Arun District Council (ADC) to the South Downs National Park Authority (SDNPA), which is now responsible for Development Management and Planning Enforcement as well as Planning Policy.

The emerging National Park Local Plan will set out how this Parish and the National Park generally will develop in the future.

The National Park Local Plan is intended to be formally submitted to the Secretary of State in 2016 and adopted in 2017. It will set the planning policy framework for the National Park until 2032.

1.5 The Neighbourhood Plan Designated Area

2.0 Context

2.1 Introduction

This chapter sets out the evidence base that supports the plan proposals, drawing on existing planning policy, social and demographic statistics and information about the local community today such as housing issues, transport and movement patterns, local employment, environment and heritage, flood risk and strategic development constraints.

2.2 Planning Policy Context

This section provides an overview of the planning policy context affecting Findon.

2.2.1 National Guidance

The National Planning Policy Framework (NPPF), published in March 2012, provides guidance for local planning authorities (LPAs) in drawing up plans for development and is a material consideration in determining applications. It is also an important guide in the preparation of local plans and neighbourhood development plans. At examination, the submitted FNDP must demonstrate that it is consistent with the policies and intent of the NPPF.

2.2.2 Local Planning Policy

The Parish falls within the planning authority area of the South Downs National Park. The development plan for Findon currently comprises the saved policies of the adopted 2003 Arun Local Plan. The FNDP must be in conformity with the strategic policies of the development plan. The South Downs National Park Local Plan will replace the current saved policies of the 2003 Arun Local Plan once it is adopted (scheduled for 2017).

The FNDP is being prepared in anticipation of the adoption of the new SDNP Local Plan, but focuses on being in conformity with the relevant saved policies of the 2003 Arun Local Plan.

2.2.3 2003 Arun Local Plan

The adopted Local Plan contains a number of saved policies that are of specific relevance to the FNDP:

- GEN2** Built Up Area Boundary – defining the urban area in relation to the countryside and identifying it on the Proposals Map
- GEN3** Protection of the Countryside – constraining development to specific uses and needs
- GEN7** Form of New Development – the key design principles of development
- GEN1** Inland Flooding – discouraging development in areas at risk
- AREA1** Areas of Special Character – defining areas of local interest for additional design control

2.0 Context: continued

- AREA2** Conservation Areas – restating the key principles of conservation area development management and identifying the Findon Conservation Area on the Proposals Map
- AREA5** Protection of Open Spaces – defining important spaces to protect from harmful development
- AREA9** Areas of Outstanding Natural Beauty - constraining development to specific uses and needs that reflect the special character of the AONB (now South Downs National Park)
- AREA10** Strategic Gaps – defining the gap between Findon and Worthing to prevent their coalescence and identifying them on the Proposals Map
- DEV17** Affordable Housing – establishing the requirements of development schemes and updated by a ADC Policy Statement in 2010

Although the weight attached to each policy will differ according to its alignment with the NPPF, these policies provide the framework by which the general conformity of the FNDP to the development plan will be assessed.

In general terms, the saved policies apply considerable protection to the development potential of the Parish and village. These constraints (landscape character, heritage asset and flood risk) leave limited scope for the FNDP to identify development sites.

2.2.4 South Downs National Park Local Plan

The South Downs National Park became the organisation with statutory responsibility for writing planning policy for the National Park Area on 1st April 2011. Its first Local Plan is currently in preparation, with the Options Consultation Document published in February 2014.

Its vision of the Park is that:

By 2050 in the South Downs National Park:

The iconic English lowland landscapes and heritage will have been conserved and greatly enhanced. These inspirational and distinctive places, where people live, work, farm and relax, are adapting well to the impacts of climate change and other pressures.

People will understand, value, and look after the vital natural services that the National Park provides. Large areas of high-quality and well-managed habitat will form a network supporting wildlife throughout the landscape.

Opportunities will exist for everyone to discover, enjoy, understand and value the National Park and its special qualities. The relationship between people and landscape will enhance their lives and inspire them to become actively involved in caring for it and using its resources more responsibly.

Its special qualities will underpin the economic and social wellbeing of the communities in and around it, which will be more self-sustaining and empowered to shape their own future. Its villages and market towns will be thriving centres for residents, visitors and businesses and supporting the wider rural community.

Successful farming, forestry, tourism and other business activities within the National Park will actively contribute to, and derive economic benefit from, its unique identity and special qualities.

2.0 Context: continued

Prior to the Parish of Findon becoming part of the National Park it was afforded considerable protection from development in relation to green field areas outside the settlement boundary owing to it being designated an Area of Outstanding Natural Beauty. It follows that since becoming part of the National Park such levels of protection shall be at an equally high level and the FNDP's own vision is in conformity with this enhanced level of protection to green field areas outside the settlement boundary. In order to support this protection of green field areas the FNDP has determined to retain the settlement boundary in its current state and the SDNP have confirmed that it would not be within their remit to look at changing the settlement boundary as we are at an advanced stage of our FNDP. An independent Landscape Character Assessment of the Parish was commissioned at the start of the Plan process and this has informed decisions about the settlement boundary (see Evidence Base 42,43).

3.0 About Findon

Understanding Findon is the starting point for producing a good Plan. This is because the Findon Neighbourhood Development Plan presents a valuable opportunity to plan the future of the Parish. What are the problems that the Plan could address? What are the opportunities that the plan could make the most of?

After centuries as a farming and horse racing community Findon expanded in the mid-twentieth century, catering for workers in neighbouring towns. Its population in the 2011 census was 2,025. As identified by its residents, the most important characteristics of Findon Village are its rural, close-knit and compact nature, that it has a long history, a defined 'heart' (The Square), attractive buildings, good amenities, pleasant open spaces and wonderful views.

3.1 History of the Parish of Findon

The Parish of Findon, famous in the county for its sheep fair and for racehorse training, straddles the wind-gap in the South Downs north of Worthing and is the only significant settlement in any of the gaps in the secondary escarpment of the South Downs. Findon, an ancient Parish, is roughly 3 miles across in each direction. In the north it follows an ancient track for some way, and in the south-east it runs round the outer earthwork of Cissbury Ring. The Parish lies entirely on the chalk, overlaid in some places by later deposits. Land use is divided between arable and pasture; much of the downland was formerly open sheepwalk. Parkland, however, has always been an important element in the landscape since the Middle Ages. Findon Park belonging to Findon manor, in the east of the Parish, existed by 1229. Creation of parkland was in progress at Findon Place in the early 18th Century. At Muntham park, north-west of the village, Lord Montague laid out plantations and apparently fishponds in the mid 18th Century. In the late 18th and early 19th centuries much work was done on both pleasure grounds and park.

The village of Findon lies in the centre of the Parish. Its original site was evidently near the church and manor-house, where a number of tracks formerly converged. The centre of the modern village is the Square, formed by the crossing of the two main roads. The shops on its east side occupy a 16th or 17th Century building, and Greypoint House on its south side is a late 18th Century building, with a garden wing of c.1830 to the east. Findon Farmhouse to the north was a working farm in the 19th Century. Most of the older buildings of the village are of flint or brick, with some rendering. Holmcroft, south of the Square, is an early 19th-Century villa.

Outlying settlements have always existed in the Parish besides the main village. Prehistoric and Romano-British settlement was widespread on the downs, and settlement continued south and west of Muntham House during the Middle Ages. Other sites of medieval settlement in the Middle Ages were at Heregrave in the north-east part of the Parish. Sheepcombe in the south and perhaps Palmer's Coombe in the south-west. The pattern of outlying farms remained in 1977.

3.0 About Findon: continued

Two hamlets which also survived in 1977 had existed for some time, having probably originated in the colonisation of roadside waste. North End, c. 1/2 mile north of the village on the Washington road, was mentioned c. 1485. The surviving buildings are of the 18th and 19th centuries, except for Ivy Cottage which is 17th-Century. About the same distance south-east of the village lay the hamlet of Nepcote. The surviving buildings are of the 18th and 19th centuries, except for Threshers at the south end, which is 17th-Century with 18th Century additions. East End in 1726 contained East End House, the forerunner of Cissbury House, and several other houses.

The present village developed in the late middle ages at the junction of a major east-west and a rather less important north-south highway through the South Downs. However, its history can be traced back to much earlier times.

Around 6,000 years ago Neolithic farmers started clearing the chalk hills of the South Downs, obtaining flint for axes and other tools from mines close to present day Findon. Clearing continued through the Bronze and into the Iron Age, during which the ramparts of Cissbury Ring were built (500BC). Traces of this lengthy occupation can still be seen in the outlines of small square 'Celtic Fields' and high banks known as 'Lynchets'.

In Roman and Saxon times, due to the shortage of water and improved agricultural methods, people gradually came off the hills and settled in the valleys. Findon is first mentioned in the Domesday Book of 1086, spelt as Findune, but as this name is Anglo-Saxon the community is considerably older than this record suggests.

A small medieval settlement grew up close to the old Manor of Findon and the Church (1053), although later development took place in the village's present location a little to the east. After the Black Death in 1349 the downs were largely abandoned to sheep for most of the next 600 years, generally under common rights of pasture. Agriculture provided most livelihoods and Findon remained a farming community, with about 200 inhabitants in the 17th century. By the middle of the 19th century an annual Sheep Fair on Nepcote Green was well established and racehorse training had begun on the excellent downland turf. These continue to define Findon. Principal landowners in the Parish included the Lords of Findon and Muntham manors and the owners of Cissbury estate, whilst for many years the living of Findon was a vicarage in the gift of Magdalen College, Oxford. Interestingly, Lordship of Findon Manor passed to the Parish Council in 1937 at the same time as The Wattle House was given to the Council by the previous owner.

Administratively, Findon was incorporated in Thakeham United Parishes in 1789. In 1933 it became part of Worthing Rural District, before being transferred to Arun District in the local government reorganisation of 1974.

Findon's population has grown steadily since the first census of 1801:

1801	381	1971	1,616
1871	681	2001	1,848
1931	930	2011	2,025

3.0 About Findon: continued

The High Street formed southwards from The Square and the Gun Inn (1450), with a number of substantial Georgian and Victorian properties built on both sides of the road. There is also a string of ancient wells, all over 200 feet deep, towards the southern end.

With the arrival of the motor car in the first half of the 20th century, major residential development began to take place in the village and the ever-increasing traffic eventually resulted in the need for a by-pass on the A24. This was completed in 1938.

A significant number of new housing developments took place in the 1930's, including The Oval and Homewood council estate and The Quadrangle. Building, particularly of bungalows, resumed post-war with completion of The Chase and the large Beech Road estate to the north of The Square (previously Findon Farm).

During this period, the hamlet of Nepcote became linked to Findon Village by housing development in Nepcote, Steep and Cross Lanes. Finally, small estates of executive homes were built towards the end of the last century, most notably Convent Gardens and Fox Lea.

To date, development has been contained within the boundary of the village, often by infilling of large gardens, but almost all such available space has now been built upon. Agricultural employment has naturally declined, but dairy and arable farms continue to thrive throughout the Parish, together with active and successful horse racing stables.

Over the last 15 year period 75% of new houses were 4 or 5 bedroomed properties.

Findon continues to be an attractive and popular place to live for all ages and family sizes. The resulting variety of differing households contributes to the dynamic mix that Findon represents. It is also seen as a destination village, popular with visitors owing to its charm, accessibility, closeness to the South Downs Way as well as its numerous pubs, restaurants and specialist shops.

A full and detailed history of the Parish can be found in the Evidence Base. (Character and Heritage Document - Evidence Base 22)

3.0 About Findon: continued

3.2 Community Profile

Key Statistics:

Population of **2,025** in **915** households.

Weekly household earnings estimated to be **higher** than England average.

Housing and Council tax benefits claimants, income support claimants, pension benefit claimants **less than half** the England average.

79.5% owner occupiers (West Sussex average 71.5%)

Population density **1.25** people per hectare (England average 4.1)

14.7% aged under 16 years old (England average 18.9%)

28.2% aged over 65 years old (England average 16.3%)

17.9% single pensioner households (national average 12.4%)

4% living in income deprivation (England average 13.5%)

8.5% of children living in 'out of work' households (England average 19.2%)

10.2% have a limiting long term illness (West Sussex average 11%)

51.4% of homes are detached (national average 22.3%)

7.5% of housing is social rented, 13% other rented
(West Sussex averages 12.8% & 15.8% respectively)

88.5% of households have one or more cars (74.2% England)

Outward migration: 15-24 yrs **129**; 25-44yrs **116**; 45-64 **45**; over 65 **38**

Inward migration: 15-24yrs **135**; 25-44yrs **131**; 45-64 **63**; over 65 **26**

Net inward migration **27** (2009/10)

Source: Community Profile compiled by Action in Rural Sussex (see Evidence Base 60).

3.0 About Findon: continued

3.3 Environment and Heritage

The village of Findon presents as a small quiet settlement situated at the foot of the South Downs: some tree lined roads, grass verges and wide strips of roadside planting of trees and hedgerows provide a range of habitats. The public rights of way, bridleways and the long distance footpath 'The Monarch's Way', which link the village with the surrounding countryside, ensure that all residents and visitors are able to access Natural Greenspace (Natural England 2010).

As Findon is situated at the foot of the Downs it is visible from the open downland countryside surrounding it which is used daily by walkers, horseriders and cyclists. From Cissbury Ring, (an ancient Iron Age Fort), and the adjoining countryside, the village can be seen beyond the fields and paddocks which surround its eastern and northern boundary. For those walking the Monarchs Way the highest (eastern) entrance to the village is along a rough chalky flint, past the Gallops where racehorses train every day, past Stables, farmland and horses grazing up to the edge of the settlement boundary. For those walking the lanes and public footpaths through the village, there are constant glimpses and more of the surrounding downs. Views are a significant part of the charm of this attractive village. (source 'Natural England' 2010)

The equestrian heritage of the village continues with two racing stables, livery opportunities and breeding, training and showing programmes accommodating over 100 horses. For residents and visitors alike, horses being ridden along the lanes through the village and along the bridleways are a daily experience that adds much to the quality of life. Horses grazing in the paddocks, racehorses being taken through their paces, the sound of hooves galloping across the fields or clopping on the lanes provides a sensory bridge from the past to the future. It is an important part of the heritage of the village and must be protected for the benefit of all. Grazing paddocks even within the settlement boundary have been lost over the years and those remaining are necessary to ensure the continuing presence of horses within the village and parish. A map is included in the evidence base showing the degree to which equestrianism is part of the community (see Evidence Base 5).

The main part of the village settlement lies to the east of the A24 dual carriageway and lies distinctly separate from Findon Valley, a suburb of Worthing, to the south. The separation, known as 'The Findon Gap', is delineated by agricultural land and is considered an important part of retaining Findon's downland village identity.

The steep escarpment of the South Downs is an iconic part of the National Park's landscape. Locally this is breached by the Arun and Adur rivers creating a well-defined block of downland between two major rivers with steep sided valleys.

Less apparent than the iconic primary escarpment is a secondary escarpment which is most pronounced in the Findon area where the escarpment can be traced by joining the summits of Cissbury Hill, Church Hill, Blackpatch Hill and Barpham Hill. These hills owe their origin to the dissection of the secondary escarpment by long-disappeared rivers which have left dry valleys between the hills. The most significant of these is the Findon Dry Valley (see Evidence Base 19 for maps and detail).

3.0 About Findon: continued

3.3.1 Habitats

The hard chalk grassland, historical sheep pasture and scrub areas support diverse plant, bird and animal species. Sympathetic woodland and hedgerow management has provided a refuge for woodland and farmland species and a primary habitat for species of conservation concern as well as acting as a barrier to soil erosion. The arable farmlands and linking safe corridors provide feeding opportunities throughout the year and overwintering stubble alleviate runoff. The Sussex Biodiversity Record centre shows it to support diverse plant, bird and animal species including some where population and range has rapidly declined in recent years.

Within the built up area of the village, despite development and in-filling, green spaces have been retained for community use. These support a range of habitats for wildlife and, most importantly, the green corridors of tree-lined (many with TPO's) grass verges, hedgerows and retained unfenced strips of roadside planting which connect them and the countryside provide foraging lines for bats, shelter for small mammals and amphibians and are a great food source for insects and birds. In terms of the local human population all residents are able to access "Natural Green-space".

The important recreational and business rewards to the local economy as well as the enjoyment that the area provides, with significant long distance bridle and cycle ways along well established routes, villages and towns cannot be underestimated. With the national Monarchs Way and South Downs National Park the Parish is in a position to enhance and preserve a valuable landscape for the future.

3.3.2 Ancient Woodland

The Parish has 6 areas of designated ancient woodland (see Evidence Base 20).

3.3.3 SSSI

The Parish has two areas designated as SSSI's (see Evidence Base 20).

3.3.4 Tree Preservation Orders

The Parish has around 40 Tree Preservation Orders in place (see Evidence Base 27).

3.3.5 Listed Buildings

The Parish has 26 listed buildings of which the Church of St John the Baptist has a Grade I listing. The church has a wealth of features dating back to at least the 12th Century and a church was mentioned in the Domesday Book (see Evidence Base 21).

3.3.6 Scheduled Ancient Monuments

The Parish has six scheduled ancient monuments which include flint mines, saucer and platform barrows (see Evidence Base 33). Details of further non-scheduled archaeological remains are available from the West Sussex Historic Environment Record.

3.0 About Findon: continued

3.3.7 Conservation Areas

The Parish has one Conservation Area (CA) centred on the village square (see Evidence Base 28). This CA is recorded in a Supplementary Planning Guidance document issued by Arun District Council who were the planning authority at the time of the designation. It is described as being ‘centred on The Square and includes short parts of Horsham Road and School Hill, and the important Listed Buildings which stand on the street corners forming The Square. The area is characterised by tightly grouped, street-fronted buildings of attractive design and materials.’ The SDNPA will be responsible for carrying out any review of the CA.

A second Conservation Area centred on Nepcote is under consideration at the request of the Neighbourhood Plan Steering Group. This work has been prioritised by SDNPA. This addition was welcomed by the residents when presented at the open events.

3.3.8 Buildings or Structures of Character

The Parish has 32 buildings listed in the ADC Supplementary Planning Document (Sept 2005) as Buildings or Structures of Character (see Evidence Base 29).

3.3.9 Housing

Housing mix within the Parish is varied, but comprises predominantly detached and semi-detached dwellings (see Appendix 5 for Census data).

3.4

Getting Around

3.4.1 Buses

There are two bus services that run south to Worthing and north to Midhurst and Horsham, running half hourly and hourly respectively on weekdays with a more limited service at weekends and no service in the evening. The bus services do not link with the National Rail service in Worthing, either geographically or with regard to timetabling, which limits the opportunities for residents to use public transport to access services further afield and tourists/visitors to access the South Downs from further afield. FDNP would seek to encourage dialogue between the bus companies, National Rail and SDNP to facilitate a better service for residents of the Parish and travellers from further afield.

3.4.2 Trains

The nearest rail station is at Worthing, some 5 miles away.

3.4.3 Community Transport

Arun Co-Ordinated Community Transport is a registered not for profit charity based in Ford near Littlehampton. Founded in 1996 it became a registered charity in 2000. The organisation offers a wide range of transport solutions for clients (around 4,000 a month) to visit doctors, dentists, hospital or other appointments, but who have difficulty using public transport due to a mobility or visual disability, illness, frailty, age or other impairment. As well as conveying clients to their respective appointments, the charity also organises weekly minibus trips to local visitor attractions, restaurants and shopping centres. Around 13 residents of Findon use the service on a regular basis and Findon Parish Council makes an annual voluntary contribution to support this service.

3.0 About Findon: continued

3.4.4 Footpaths and Bridleways

The Parish has an extensive network of footpaths and bridleways, including the popular South Downs Way and Monarch's Way, one of the longest footpaths in England, which runs right through the village (see Evidence Base Map - 11).

3.4.5 Roads and traffic

Traffic volume is a major concern to the residents of Findon. The narrow lanes in the village, which follow the route of ancient tracks and bridleways, are consistent with its rural character but are not conducive to the competing needs of pedestrians, cyclists, horse riders, cars and trucks. In many places, only single lane traffic is possible. Also, the principal road through the village, the High Street, is severely limited in width, especially through the Conservation Area. This results in the public bus, and potentially emergency vehicles, being obstructed by parked vehicles. The A24 Findon by-pass enables non-local traffic to avoid the village centre whilst access via School Hill, Nepcote or Cross Lane provides an alternative to residents of those areas. Traffic calming measures and parking restrictions need to be considered to bring about a more cohesive system of traffic management and thus help to ensure the safe passage of pedestrians of all ages, cyclists, and horse riders, who are a significant presence in the village. School Hill has particularly significant safety issues owing to its narrow dimensions, lack of adequate roadside footpaths and the presence of many cars at school drop off and pick up times.

The A24 runs in a north/south direction as a dual carriageway on the western boundary of the village. At the present time, when the school children are attending the Parish church it is necessary for the Police to attend to stop the traffic in order to allow safe passage.

Narrow lanes with consequent limited parking opportunities, causes considerable damage owing to parking on the grass verges, which are being constantly eroded at points.

Whilst it is important to encourage visitors to use the services and amenities of the village and outlying countryside, the lack of parking is a practical limitation on numbers coming to the village without causing undue congestion and inconsiderate parking (see Evidence Base 15, 16).

3.4.6 Street Lighting

Despite close proximity to the large developments of Findon Valley and Worthing itself, Findon is largely free from light pollution. It is officially classed as an unlit village, with only a handful of street lights to impact upon excellent night-time sky-scapes. The majority view of residents supports maintenance of the current unlit status.

3.4.7 Cycling

The network of bridleways on the South Downs around Findon attract extensive use by mountain bikers throughout the year and, indeed, during the hours of daylight and darkness. Off-road mountain biking routes link Findon to the population centres of Worthing, Steyning and Storrington but access to Findon for family cyclists is restricted by having to share the A24 and A280 with fast moving traffic.

Employment opportunities exist within the village due to the school, a range of shops, restaurants and various businesses which operate, together with employment in the care and domestic fields. Excellent road access to Brighton, Worthing, Horsham, Chichester and other places provide Findon residents with a large range of employment opportunities.

3.0 About Findon: continued

3.5 Employment and Enterprise

Findon Parish has a population of approximately 2,000, of whom approximately 965 (2011) are in full-time, part-time or in self-employment.

7.7% travel more than 40km to work; 7.3% work from home and 11.2% travel less than 2km to work. Source: Community Profile compiled by Action in Rural Sussex (see Evidence Base 3 and 4).

3.5.1 Businesses

Findon is very much a working Parish, with over 100 businesses which include:

- A large nursery/garden centre, incorporating several ancillary businesses;
- Several smaller retail units, including a Post Office/general store, butcher and shoe shop;
- Several hospitality-based businesses, including a hotel, three public houses, three restaurants and a tearoom;
- Livery and racehorse training stables and other equestrian-related businesses;
- A crematorium;
- Several farms;
- Numerous home-based businesses, covering a large variety of occupations and services (see Evidence Base 6,7).

Health and Social Care is the largest employment sector with retail then construction second and third. Managerial and professional occupations are both higher than the national average.

3.5.2 Tourism

There are several natural and other attractions located either in or close to the Parish, including:

- Nepcote Green (iconic views and of special local amenity value for residents, families, children, young people, dog walkers and the annual Sheep Fair);
- Findon Parish church (11th Century);
- Cissbury Ring (The second largest hill fort in England – maintained by the National Trust);
- Chanctonbury Ring - accessible from the village via public footpaths;
- The South Downs Way (popular with cyclists and hikers);
- Numerous public footpaths and bridleways;
- Several historic pubs and restaurants, as well as a hotel catering for weddings and special events;
- The Gallops – race horse training, jumping including a bespoke sand gallop located on the Downs;
- Tourist accommodation comprising hotel facilities at Findon Manor Hotel and the Village House plus a limited number of self catering units (see Evidence Base 8).

3.0 About Findon: continued

3.5.3 Broadband/Communications Infrastructure

Poor broadband connectivity was quoted as the single most important improvement needed by businesses in the Parish. Since 2015 faster broadband is being made available to most parts of the village, with further improvements still ongoing (Evidence Base 9).

3.6 Community Facilities and Wellbeing

Findon Parish has a range of community services and facilities which support the health and well being of the local community. These include footpaths, allotments, recreation and leisure facilities as well as a primary school.

The community profile shows that 84% of residents are satisfied with the local area as a place to live and 62% feel they belong to the neighbourhood (Evidence Base 18).

3.6.1 Schools

St John the Baptist Church of England Primary School

There has been a school in the village since the 1830's. It is situated in the heart of the village and caters for 4-11 year old children. There are currently over 150 pupils. Of the 103 families with children at the school, 63 are residents of the Parish. The school is well respected and its popularity has an impact on the village in terms of parking, transport and property availability.

Findon Village Pre-School

Findon Village Pre-school is situated behind the Village Hall and caters for 2-5 year old children. There are 4 qualified members of staff who provide a curriculum for the children based on the Revised Early Years Foundation Stage guidance. In the Village Survey 12% of residents use the Pre-school regularly or occasionally but 72% think it is important to have the facility in the village (Evidence Base 17).

Lambs Tails

Lambs Tails is a group activity for 0-4 year old children accompanied by parents or carers, and meets in the Village Hall. It is run by parent volunteers.

3.6.2 Churches

St John the Baptist Church of England church was founded in the 11th Century, and is set apart from the village on the west side of the A24. It is of a good size and its mixture of new pews and chairs can easily accommodate up to 200 people.

3.6.3 Medical and Care facilities

There is no general doctor's or dentist's surgery located within the Parish. Most residents travel to the Limetree Surgery in Findon Valley, approximately 1.7 miles away from the village centre.

Nightingales Sheltered Housing

The property is owned by Arun District Council who are responsible for allocating residents. The facilities are managed by Family Mosaic, a national housing association, and cater well for those with mobility issues. There is no resident warden, but support is provided via a helpline. Limetree Surgery from Findon Valley provides on-site medical support for residents on a fortnightly basis.

3.0 About Findon: continued

3.6.4 Recreation

Village Hall

The Village Hall was built and opened in 1938, and since that time has remained in constant use. There are currently approximately 10 local organisations using the facility on a regular basis, with several other organisations using it on an adhoc basis. The Village Hall is an important amenity to the residents and visitors in terms of the activities and social opportunities it offers.

Glebeland

An area of land behind the Village Hall which was purchased by the Parish Council approximately 4 years ago. On this land the pre-school building and a public football/basketball court are located.

Pond Green

A small green in the centre of the village, owned by Arun District Council, which hosts local events such as country dancing and an Easter open air church service.

Nepcote Green

The registered Village Green. The Wattle House, a Grade II listed building on the Green, is also owned by the Parish Council and is used for the storage of equipment used at the annual Sheep Fair. Nepcote Green is an iconic symbol of Findon and a popular area for dog walkers.

Homewood Playground

This green space, sometimes known as 'The Park', is a small, unfenced, grassed area at the north end of the village owned by Arun District Council. Near the entrance is a small area with play equipment for toddlers and young children.

Swimming Pool

The pool is a unique facility, unusual for a village the size of Findon. It is a heated, outdoor pool, built by village residents in 1966 in the grounds, and for the use, of the St John the Baptist primary school. To assist in maintenance costs, it was subsequently opened to the general public. It is run by a committee of volunteers who are responsible for maintenance, supervision, publicity and fundraising.

Cricket Club

Findon cricket club was formed in 1897. It has its own ground, situated just to the west of the village. The club has approximately 500 members of which 62 are Parish residents.

Allotments

At present there are 9 full-size allotments in Findon provided by the Parish Council, 4 of which are shared giving a total of 13 plots. In addition, a local landowner currently provides a further 10 small allotments on an informal basis initially to members of the Findon Gardens Association. There are currently 12 residents on the Parish Council waiting list for allotments.

Basketball Court

The Basketball area situated behind the Village Hall is undergoing a conversion into a multi sport pitch for both football and basketball. The local primary school will have secure access when using the pitch. The community will have open access at all other times.

Mobile Library

The mobile library service comes to the village on alternate weeks.

4.0 Vision and Core Objectives

4.1 Vision Statement

The vision for Findon in 20 years time seeks to capture the community's views and aspirations for the Parish. It therefore forms the basis on which the strategic objectives and proposed policies have been formulated.

Findon Parish will continue to be an attractive place to live. It will maintain its intrinsic rural character whilst allowing for sustainable development and improving local services.

The Parish will be connected to the wider South Downs National Park and its neighbours through a network of cycleways and footpaths. Local shops will continue to flourish within the village providing an important part of daily community life. Local businesses and those working from home will benefit from an enhanced broadband service with the ability to expand to local small start-up business premises.

4.2 Core Objectives

The vision is underpinned by a clear set of core objectives that seek to make a positive contribution to sustainable growth within Findon Parish, both economically, environmentally and socially.

Our core objectives are to:

- Support new residential development which complements the current character and cultural heritage of the village and which also is sustainable in terms of infrastructure to the village in general;
- Maintain an attractive mixture of green spaces and residential properties;
- Encourage, where both possible and viable, appropriate infrastructure including health, transport and community facilities, to meet the needs of all in the community;
- Ensure that new development does not increase flood risk to existing properties or land within the boundary of the Parish or within that of its immediate neighbours;
- Support housing development which meets identified needs where such housing is appropriate to its environment, and meets statutory planning guidelines and the intentions set out in this FDNP;
- Support measures to best ensure the safety of pedestrians, cyclists and horseriders, to minimise traffic congestion, to reduce inconsiderate parking and to best ensure that school children can walk to and from school with minimum risk of injury from vehicles;
- Conserve and protect the views of the surrounding countryside from and to the village for the benefit of residents and visitors to the South Downs National Park.

5.0 Neighbourhood Plan Policies

5.1 Introduction

The preceding section sets out the overall vision for Findon. The following sections set out the policies to support the vision. The policies are grouped under the following topics:

- Business and Tourism
- Getting Around
- Community Facilities and Wellbeing
- Environment and Sustainability
- Housing and Design Quality

Each topic has its own section, broken down into objectives and policies relating to those objectives. Each policy is set out in bold type, followed by text providing a justification.

5.2 Sustainable Development

The FNDP supports the principles of sustainable development as set out in the NPPF namely:

“There are three dimensions to sustainable development: economic, social and environmental. These dimensions give rise to the need for the planning system to perform a number of roles:

- an economic role – contributing to building a strong, responsive and competitive economy, by ensuring that sufficient land of the right type is available in the right places and at the right time to support growth and innovation; and by identifying and coordinating development requirements, including the provision of infrastructure;
- a social role – supporting strong, vibrant and healthy communities, by providing the supply of housing required to meet the needs of present and future generations; and by creating a high quality built environment, with accessible local services that reflect the community’s needs and support its health, social and cultural wellbeing; and
- an environmental role – contributing to protecting and enhancing our natural, built and historic environment; and, as part of this, helping to improve biodiversity, use natural resources prudently, minimise waste and pollution, and mitigate and adapt to climate change including moving to a low carbon economy”

The principles of sustainable development are part of the same framework which sets out the protection of the landscape as mirrored in the South Downs Local Plan: Preferred Options September 2015 - 1.11 which states:

5.0 Neighbourhood Plan Policies: continued

“Great weight should be given to conserving landscape and scenic beauty in national parks, which have the highest status of protection in relation to landscape and scenic beauty along with the Broads and Areas of Outstanding Natural Beauty“.

The FNDP welcomes the continued protection of agricultural/green land of the parish, which mirrors and enhances the previous policies of Arun DC.

Each policy within the Plan has been assessed against the principles set out in the NPPF as well as against the objectives set out in the FNDP (they are displayed below each policy and refer to the numbers in those sections).

NPPF Achieving sustainable development

1. Building a strong, competitive economy
2. Ensuring the vitality of town centres
3. Supporting a prosperous rural economy
4. Promoting sustainable transport
5. Supporting high quality communications infrastructure
6. Delivering a wide choice of high quality homes
7. Requiring good design
8. Promoting healthy communities
9. Protecting Green Belt land
10. Meeting the challenge of climate change, flooding and coastal change
11. Conserving and enhancing the natural environment
12. Conserving and enhancing the historic environment
13. Facilitating the sustainable use of minerals

5.0 Neighbourhood Plan Policies: continued

5.3 Business and Tourism

Objectives

1. Maintain and secure the future and character of the village and Parish which is distinguished by a distinct equestrian and semi-rural character and which is supportive of its centrally located shops, pubs and restaurants.
2. Ensure Findon remains a sustainable working village which is attractive as a location for self employment, small businesses and people working from home.
3. Ensure Findon Parish and village supports sustainable rural tourism aimed at walkers, cyclists and horseriders in particular but which seeks to minimise the traffic flow problems to maintain its narrow country lanes.
4. Promote reliable and fast Broadband to support new and existing businesses and all members of the Parish community and visitors.

Policy BT1 *Support for business*

Development proposals to upgrade or extend existing employment sites will be supported unless the proposal would cause unacceptable harm to the amenities of surrounding properties, landscape, wildlife and cultural heritage.

BT1.1 To encourage and attract business to Findon is important given the limited amount of employment opportunities.

Justification: NPPF 1, 3; Obj. 2

Policy BT2 *Retention of employment land*

Proposals for the redevelopment or change of use of land or buildings categorised in employment use to non-employment uses shall not be permitted, unless the existing use can be shown to be no longer economically viable. Evidence should be provided by the developer that the site has been actively marketed, at the market rate current at the time, for a minimum of 12 months and no sale or let has been achieved.

Residential development will not be permitted in locations where the amenities of future residents would be adversely affected by noise, smell or disturbance from existing employment uses

BT2.1 Opportunities for employment within the village are limited which contributes to the amount of out commuting each day. Small scale employment sites contribute to the liveliness and activity in the village and also support trade in village shops.

5.0 Neighbourhood Plan Policies: continued

BT2.2 New residential development should be located to ensure there is no impact on existing commercial uses by way of noise, smell or traffic. This is considered important as too often new residential properties complain about established businesses, causing them to relocate or limiting their business activities.

Justification: NPPF 1, 3; Obj. 2

Policy BT3 Support for new commercial uses

Change of use to Class B1 uses (including light industry) and new development for such uses will be supported, where the impact on the amenity of the area, landscape, wildlife and cultural heritage is not unacceptable and other policy considerations are complied with. Change to Class B2 uses (general industry) or Class B8 (distribution and storage) will generally be resisted.

BT3.1 Light industrial uses will be supported. However, general industrial use (B2) and distribution and storage (B8) are considered inappropriate for the Parish due to the heavy goods traffic they can generate. Any increase in heavy goods traffic will have a detrimental effect on the Parish and on existing businesses.

Justification: NPPF 1, 3, 8; Obj. 2

Policy BT4 Retention of retail frontages

Change of use from retail will not be permitted unless it can be demonstrated that retailing is no longer a viable use, particularly by the premises having remained vacant for at least a 12 month period despite reasonable attempts to market the premises for retail purposes on reasonable terms and conditions. (Evidence that the unit has not been made deliberately unviable, that marketing has been actively conducted for a reasonable period of time and that alternative retail uses have been fully explored will be required).

BT4.1 The character of the village centre rests largely on its retail frontages and so it is important that they be retained. Such retail uses are an important resource for businesses, visitors and residents.

BT4.2 The village shops in Findon are an essential part of the fabric of life for many residents. Out of town shopping and online shopping makes it hard for small local shops to compete. The Plan seeks to support and promote local shops and businesses.

Justification: NPPF 1, 3; Obj. 2

5.0 Neighbourhood Plan Policies: continued

Policy BT5 Car Parking

Proposals which remove existing parking in the vicinity of existing retail and commercial premises will not be supported. Proposals which reduce existing available parking in the Parish will be resisted. Any commercial enterprise applying for permission which would result in a reduction of off street parking will not be supported.

BT5.1 Car parking is seen as vital to supporting the shops, businesses and tourism within the village and existing car parking issues must not be exacerbated. Excessive on street parking not only causes congestion, but poses a risk to the safety of pedestrians, cyclists and horse riders. Any increase to this should be avoided.

Justification: NPPF 1, 3; Obj. 3

Policy BT6 Policy BT6 Shopfront and business signage

Proposals for signs will be supported where they are proportionate and in keeping with the area surrounding the business. Illuminated signs and advertisements will not normally be permitted.

BT6.1 Inappropriate signage in this rural location can significantly harm the amenities and setting of the surrounding area.

BT6.2 Illuminated signs are not considered appropriate and would detract from the Findon Neighbourhood Development Plan policy CFW7, the SDNPA 'dark sky' objectives and the Village unlit status as well as being visually imposing.

Justification: NPPF 11; Obj. 2

Policy BT7 Improving signage

Proposals for the improvement of signage for local facilities will be supported, provided that they are appropriate to their surroundings.

BT7.1 Improving signage to promote the facilities available in Findon will support local shops, businesses and tourism. The DoT document 'Reducing Sign Clutter' recognises the fact that over-provision of traffic signs can have a detrimental effect on the environment and can dilute more important messages. Reductions in signage 'clutter' will be supported.

Justification: NPPF 1, 3; Obj. 2

5.0 Neighbourhood Plan Policies: continued

Policy BT8 Sustainable Recreational and tourism activities

Development proposals that provide facilities for recreation and tourist activities will be supported throughout the parish provided that:

- *the siting, scale and design respects the character of the surrounding area, including any historic and natural assets;*
- *the local road network is capable of accommodating the additional traffic movements;*
- *adequate parking is provided on the site.*

BT8.1 Sustainable tourism which is appropriate to the overall character of the Parish will benefit the local economy the rural landscape and biodiversity.

Justification: NPPF 1, 3; Obj. 3

Policy BT9 Communications infrastructure.

All new residential, employment and commercial development must be designed to connect to high quality communications infrastructure. Support will be given for proposals that help to provide improved/additional connectivity for the Parish as a whole provided that they make use of all available technologies to minimise their impact on the landscape.

BT9.1 The importance of high quality communications connectivity to allow access to online services, build businesses, improve educational opportunities and for simply keeping in touch with family and friends is critical. Results from the 2014 residents survey indicated that lack of connectivity was stifling business expansion. The West Sussex County Council Better Connected Broadband Delivery Plan supports the need for high quality communications infrastructure within the county area.

Justification: NPPF 5; Obj. 2, 4

Policy BT10 Home Working

Proposals to build office accommodation in the curtilage of a domestic building for self-employment purposes will be supported only if the impact on the amenity of adjoining properties is acceptable in terms of:

- *the siting, scale and design respects the character of the surrounding area, including any historic and natural assets;*
- *adequate parking is provided on the site.*

Conditions to prevent the subsequent conversion of such accommodation to independent residential use must be applied.

BT10.1 Home working is a significant feature of Findon as can be seen from the Survey Results (see Evidence Base 2).

Justification: NPPF 1,3 ; Obj. 2

5.0 Neighbourhood Plan Policies: continued

Policy BT11 Redundant Agricultural and Rural Buildings

Conversion of redundant agricultural and other rural buildings outside the built up area boundary will be supported. Buildings must be structurally sound, where no major alterations to the external fabric and no significant additions are required, where features or fabric of architectural or historic interest are retained and where the proposals comply with other development plan policies. Conversion to live/work units will also be supported.

BT11.1 The re-use of redundant agricultural building for small business use can bring vital employment into such areas and prevent redundant buildings from falling into disrepair.

Justification: NPPF 1, 9; Obj. 2

5.0 Neighbourhood Plan Policies: continued

5.4 Getting Around

Objectives

Support sustainable forms of transport (walking, cycling, horse riding and public transport), through the promotion of new cycle ways and connections to the Findon Valley cycle path to the South and the top of Washington Bostal to the North.

1. To support initiatives that seek to preserve the pre 1840 historic rural roads and quiet lanes.
2. Support initiatives that reduce the CO2 emissions and other airborne pollutants associated with road traffic.
3. Support development in the most sustainable locations e.g. where they are close to existing shops and services.
4. Promote the identification of and designation of "Quiet Lanes" throughout the Parish to enhance their tranquility and beauty, improve user safety, widen transport choice and contribute to a growing QL Network.
5. Promote and support initiatives that improve pedestrian safety and safer routes to local schools and promote roadside and path maintenance to ensure that essential signs are always visible.
6. Support appropriate reductions in road side signage and highway furniture and measures to create a more attractive streetscape particularly in the village centre.
7. Promote and support traffic speed reduction such as through the provision of 'village gateways' at the entry points to the village and the introduction of a 20mph speed limit throughout the village centre and adjoining 'quiet lanes'.
8. Promote road user education and awareness of the road environment (drivers, cyclists, pedestrians and horse riders) to improve user behavior on narrow and unlit roads which attract a wide range of users.
9. Promote and support initiatives on the A24 that seek to reduce speed, improve sight lines and reduce noise.

5.0 Neighbourhood Plan Policies: continued

Policy GA1 Sustainable Transport

Development proposals that significantly increase travel demand will only be supported where they can demonstrate that:

- *they extend or improve walking and cycling routes by making land available for those purposes where appropriate;*
- *they are located in places accessible to public and community transport or can improve the accessibility of the site to public and community transport by contributing to the provision of enhanced services;*
- *they do not result in the loss of any existing footpaths or cycle paths.*

GA1.1 Connections within the Parish and to and from neighbouring towns and villages are important as they support a range of community facilities such as shops, medical facilities and schools. Reduction in traffic volumes and speeds on the narrow roads used to access these services must be encouraged.

GA1.2 Improvements to public and community transport will be encouraged, particularly in view of the age profile of local residents and the need for traffic reduction.

GA1.3 The Parish Council will promote community liaison with bus service providers to minimise duplication, to improve the range of destinations and to enhance information on timetables, routes, services and stops within the village

Justification: NPPF 4; Obj. 3, 5

Policy GA2 Footpath and cycle path network

Support will be given, subject to other policies in this Plan, to proposals that improve and extend the existing footpath and cycle path network, allowing better access to the local amenities and services, to green spaces, to new housing where appropriate and to the open countryside. New development should provide improvements to the network where possible and must not reduce or diminish the effectiveness of the network. Support will be given for new cycle links from Findon southwards to Worthing connecting with the existing Findon Valley cycle path and northwards to the top of Washington Bostal giving access to the rural network of lanes in the South Downs National Park.

GA2.1 Although cycle and equestrian access to the village of Findon is difficult there is much movement within the Parish and, once in the village, access to the surrounding countryside is generally good for pedestrians, cyclists and horse-riders. The plan seeks to promote the maintenance of existing footpath and bridle path networks and to expand cycle path provision, initially through support for new cycle links from Findon southwards to Worthing connecting with the existing Findon Valley cycle path, and northwards to the top of Washington Bostal giving access to the rural network of lanes in the South Downs National Park. The plan supports the creation of equestrian crossings on the A24. The plan will promote path and signage maintenance in tandem with local volunteer initiatives. such as that supported by West Sussex County Council. These initiatives are seen to promote health benefits, to improve user-safety, to reduce pollution, to reduce vehicle traffic, to help sustain rural businesses and improve access to the rural environment.

5.0 Neighbourhood Plan Policies: continued

- GA2.2 Working with the local schools and the Highway Authority school travel plans will be reviewed/developed and promoted. Safer routes to the local schools will be identified as part of these plans and the necessary improvements or additions will be provided. Consideration will be given to warning lights at school drop off and pick up times.
- GA2.3 The Parish will adopt a Community Action Plan which will identify infrastructure priorities within the Parish.

Justification: NPPF 4,8; Obj. 2, 5

Policy GA3 Parking and new development

*Proposals must provide adequate parking in accordance with the standards adopted at the time.
Proposals that would result in a loss of parking spaces will be resisted.*

GA3.1 Parking issues and inappropriate vehicle speeds blight the Parish.

Justification: NPPF 11;

Policy GA4 See: Community Aspirations

Policy GA5 See: Community Aspirations

5.0 Neighbourhood Plan Policies: continued

5.5 Community Facilities and Wellbeing

Objectives

1. To promote a safe and cohesive community with access to a wider range of local facilities.
2. To promote new play provision within the Parish.
3. To ensure that new community facilities are inclusive and accessible to all.
4. To support and promote initiatives that benefit community food production such as allotments and community orchards.
5. To ensure that valued green and open space is protected from development.
6. Maintain the 'unlit' status of the village.

Policy CFW1 Independent Living

New, converted and extended independent living and care homes will be supported provided that the design and scale of development are in keeping with the character of the location, that the impact on the amenity of surrounding properties in terms of siting, parking, noise, design and external appearance is acceptable and they comply with other relevant policies in the development plan.

CFW1.1 Provision is limited to meet the demands of people with disabilities and our ageing population (28.2% aged over 65 years old - England average 16.3% see Evidence Base 18).

Justification: NPPF 8; Obj. 1

Policy CFW2 Medical facilities

Proposals for medical and dental facilities will be supported provided that the impact on the amenity of surrounding properties in terms of siting, parking, noise, design and external appearance is acceptable.

CFW2.1 The community would benefit from the provision of medical facilities in the village.

Justification: NPPF 8; Obj. 1

5.0 Neighbourhood Plan Policies: continued

Policy CFW3 Recreation facilities

Existing open spaces including school playing fields, outdoor sport and recreation land should not be built on. The provision of recreational facilities, including ancillary buildings such as changing rooms will be supported provided that their design and scale are in keeping with the landscape and local character and that the impact on the amenity of surrounding properties in terms of siting, parking, noise, design and external appearance is acceptable.

CFW3.1 Survey results show how well valued the leisure facilities are to residents and visitors but have also identified a need for improvements and additional facilities.

Justification: NPPF 8; Obj. 1,2,3

Policy CFW4 Provision of allotments

If land formally designated as, but not being used for allotments becomes available and there is a Parish Council waiting list for allotments, its use for allotments will be supported (See Map 1).

CFW4.1 The 2014 survey identified a need for additional allotment provision within the Parish. Allotments are a place of social connectivity and not only provide opportunities to grow food but also contribute to local wildlife habitat and improved health and fitness.

Justification: NPPF 8; Obj. 1,3,4,5

Policy CFW5 Assets of community value

Proposals that will enhance the viability and/or community value of any property included in the register of Assets of Community Value will be supported. Proposals that results in the loss of such a property or in significant harm to its community value will be resisted, unless it can clearly be demonstrated the continuing operation of the property is no longer economically viable.

CFW 5.1 The buildings in Findon currently proposed for inclusion in the Register of Assets of Community Value are listed in Appendix 1. They are recognised as significant in the economic, social viability and sustainability of the community.

CFW5.2 The loss of any of the shops and the Post Office in the village would have a significant impact on the community. The public houses are part of the social fabric of the village as is the village hall. Each asset is a major feature of daily life for residents and each plays a central part in the vitality of the Parish and the sense of community.

Justification: NPPF 8; Obj. 1; The Assets of Community Value (England) Regulations 2012

5.0 Neighbourhood Plan Policies: continued

Policy CFW6 Local Green Space

The areas shown in Appendix 2 and accompanying map are designated as Local Green Space. Proposals for development of these areas will not be permitted except in special circumstances.

CFW6.1 These open spaces are very important as places of tranquility, beauty and wildlife.

CFW6.2 The NPPF paragraph 76 states that “by designating land as Local Green Space communities will be able to rule out new development other than in very special circumstances and that Local Green Space should be managed in line with the policy for Green Belts.”

Justification: NPPF 8; Obj. 5

Policy CFW7 Local Open Space

The areas listed in Appendix 3 and accompanying map are designated as Local Open Space. Proposals for development in these areas will not be permitted unless it can be demonstrated that:

- *The benefits of the development outweigh any identified harm;*
- *There are no reasonable alternative sites available.*

CFW7.1 Our outdoor spaces are vital to maintaining a happy and healthy community. Surveys have shown how much they mean to residents and visitors. These open spaces contribute to the open and pleasant ambience of the area and are used for exercise and children’s play but also contribute to wildlife biodiversity and habitat.

Policy CFW8 Dark Night Skies

Development proposals which detract from the unlit environment of the Parish will not be supported. The importance of dark skies will be respected throughout the Parish as a priority. Security and other outside lighting on private and public premises will be restricted or regulated to be neighbourly in its use including floodlighting at equine establishments and on sports fields or sports grounds.

CFW8.1 Findon is one of the few places left in the south east of England where light pollution is minimal and the full night sky can be seen. Findon will seek to develop this status as part of its tourism offering (reference darkskydiscovery.org.uk).

Justification: NPPF 11, 12; Obj. 6

5.0 Neighbourhood Plan Policies: continued

5.6 Environment and Sustainability

Objectives

1. Ensure that flood risk and water pollution is minimised throughout the Parish.
2. Conserve and enhance local hedgerows, watercourses and wildlife corridors for their landscape and wildlife value in partnership with local landowners.
3. Conserve and enhance designated and non-designated heritage assets (including listed buildings, scheduled monuments, the Conservation Area and buildings of special character) which contribute to the heritage value and setting of the Parish
4. Support sustainable forms of energy generation
5. Link local landscape and wildlife corridors to wider networks including Green Infrastructure Corridors and public rights of way
6. Enhance and conserve the countryside within the Parish

ES1

See: Community Aspirations

Policy ES2 Surface water management

New development, apart from small residential and commercial extensions, will not be approved unless it can be demonstrated that the development will not increase the risk of flooding either to itself or other land, arising from the carrying out and the use of the development.

Any planning permission for new development which will increase surface water run off will be subject to a condition requiring that full details of the proposed surface water drainage scheme has been submitted (including details of its route, design and specification and details of its management and maintenance) and have been approved in writing by the Local Planning Authority. The development shall not be occupied until the drainage scheme has been implemented in accordance with the agreed details.

Consideration must be given to the use of Sustainable Urban Drainage Systems (SUDS) as alternative to conventional drainage where appropriate. Sustainable drainage systems on private property, whether they are private or adopted, must be approved by the Local Planning Authority prior to the commencement of development.

All new or replacement driveways or on-site parking areas must be constructed of permeable materials.

- ES2.1 Findon Village has suffered several major floods in recent history, notably in 2010, 2012 and 2014. Heavy rain on recently ploughed fields in 2002 resulted in more than 100 tonnes of topsoil being deposited into the heart of the village causing many thousands of pounds worth of damage.
- ES2.2 Findon has several country lanes that lack any type of modern drains. One example is Nepcote Lane from Cissbury Ring to the village square, (a similar scenario occurs along the section of Nepcote Lane which runs through Nepcote and down to the A24 just

5.0 Neighbourhood Plan Policies: continued

south of Cross Lane). With its natural fall into the village, excess rainwater will flow down Nepcote Lane from Cissbury Ring, and, having travelled approximately a mile without any drains prior to its junction with Convent Gardens, and continues via modern drains on towards the square. A major contributor to this problem is the lack of gully clearing and the Parish Council will lobby the Local Authority and local landowners to ensure that gullies are regularly cleared and riparian rights enforced.

- ES2.3 Findon Village has in the past few years been suffering flash flooding, and over the past three years the Parish Council has been carrying out a study into the matter with a view to finding solutions to the problem. In 2015, WSCC's 'Operation Watershed' was utilised to address some of specific problems in the Nepcote Lane area.
- ES2.4 In 2010, the Government passed a new Act, the Flood and Water Management Act, which identifies a Lead Local Flood Authority (LLFA) to establish and maintain a register of structures or features which, in the opinion of the authority, are likely to have a significant effect on a flood risk in its area.

Justification: NPPF 10; Obj. 1

Policy ES3 Protection of trees and hedgerows

Development that damages or results in the loss of ancient woodland or trees of arboricultural and amenity value, trees subject to a Tree Preservation Order or loss of hedgerows or significant ground cover and irreplaceable habitat will be resisted unless the need for, and benefits of, the development in that location clearly outweigh the loss.

Development proposals must be designed to retain wherever possible ancient trees, trees of good arboricultural and amenity value and hedgerows. Proposals which affect sites with existing trees or hedgerows should be accompanied by a survey that establishes the health and longevity of any affected trees or hedgerows and a management plan to demonstrate how they will be so maintained.

- ES3.1 Trees and hedgerows contribute to the open and pleasant feel of the Parish, its play areas and residential properties. The removal of trees to make way for development can completely change the amenities of an area and must be resisted. Loss of areas of ground cover and habitat can have a significant effect on wildlife. Hedgerows play an important part in the rural landscape and in habitat. Unmaintained they develop into rows of trees with distinctively different habitats (Evidence Base 27, 31).
- ES3.2 Apart from contributing to the character of the Parish, these areas provide an essential environmental purpose in particular with Paddock Way/Westview Terrace. Rainwater gushing along Nepcote Lane poses a constant flood risk, and pouring down the steep incline of Paddock Way contributes to that problem. The existing mature trees act as a natural sponge, helping to absorb much of this rainwater and without them Westview Terrace would be flooded.

Justification: NPPF 11; Obj. 2, 6

5.0 Neighbourhood Plan Policies: continued

Policy ES4 Renewable Energy

Proposals for energy generating infrastructure using renewable or low carbon energy sources to serve individual properties or groups of properties in Findon will be supported provided that:

- (a) The energy generating infrastructure is located as close as practicable and is in proportion to the scale of the existing buildings or proposed development it is intended to serve and;*
- (b) The siting, scale, design and impact on landscape, heritage assets, views and wildlife of the energy generating infrastructure is minimised and does not compromise public safety and allows continued safe use of public rights of way and;*
- (c) Adjoining uses are not adversely impacted in terms of noise, vibration, or electro-magnetic interference and;*
- (d) Where appropriate, the energy generating infrastructure and its installation complies with the Micro-generation Certification Scheme or equivalent standard;*
- (e) Energy generating infrastructure is not sited on agricultural land.*

ES4.1 The Arun DC Energy Efficiency Strategy 2009-2013 actively encourages the use of renewable energy schemes and the Parish Council supports this approach.

ES4.2 Micro-generation Certification Scheme (MCS) is an internationally recognised quality assurance scheme, supported by the Department of Energy and Climate Change. MCS certifies micro-generation technologies used to produce electricity and heat from renewable sources.

ES4.3 Maintaining the agricultural land uses surrounding the Parish is of paramount importance to this rural Parish, not just for the employment that it supports but also the biodiversity it supports.

Justification: NPPF 11; Obj. 4

Policy ES5 Buildings or Structures of Special Character

The Buildings and Structures of Character as designated by ADC SPD 2005 (see Appendix 6) are of significant local interest and contribute to Findon's distinctiveness and historic character. The effect of a proposal on the significance of these non designated heritage assets will be taken into account in determining an application in order to avoid or minimise conflict between the heritage asset's conservation and their contribution to Findon's distinctiveness.

ES5.1 These building contribute to the quality and character of Findon.

ES5.2 The Parish Council will work with the SDNPA to seek to add additional buildings to the list and to consider removal of permitted development rights to ensure the unique features of the buildings are not lost. A survey has been undertaken which identifies all historical flint walls throughout the Parish. The PC will seek to have these added to the list of Buildings and Structures of Special Character when it is reviewed by SDNPA as they meet selection criteria 1,2,3 and 5 of the SPD.

Justification: NPPF 12; Obj. 3

5.0 Neighbourhood Plan Policies: continued

Policy ES6 **Conservation Areas**

Proposals that would adversely affect the special interest of the Conservation Area (see Map 2) or its setting, or of any future Conservation Areas will not be supported.

ES6.1 Conservation Areas are important both historically and visually. It is important that developments that might affect views into and out of a Conservation are strictly controlled.

ES6.2 Work is underway with SDNPA to designate the area at Nepcote as a Conservation Area.

Justification: NPPF 12; Obj. 3

Policy ES7 **Flint Walls**

Development proposals that result in the removal, reduction or replacement of flint walls listed in Appendix 4 will not normally be permitted.

ES7.1 The flint walls contribute to the character of the Parish and its architectural heritage. Development proposals that seek to destroy any flint walling will not normally be supported.

Justification: NPPF 12; Obj. 3

5.0 Neighbourhood Plan Policies: continued

5.7 Housing and Design Quality

Objectives

1. Seek to ensure that new dwellings contribute towards any local connection need for smaller, lower cost and affordable homes;
2. Ensure new housing is integrated with either the built character context or the landscape character context and/or the landscape of its immediate surroundings, depending on its specific location;
3. Encourage high quality design in local vernacular, contemporary and rural forms and materials;
4. Favour proposals which reduce the carbon footprint through layout, design, low energy technologies and materials, building methods and end user facilities.
5. Support the development of 20 new dwellings to meet the SDNP housing allocation for the Parish.

HD1

See: Community Aspirations

Policy HD2 Local Connection

Affordable housing will be subject to planning conditions and/or planning obligations to require the first occupants to be existing residents of Findon Parish with a Findon connection meeting one of the following criteria:

- (a) a person who currently lives in the Parish and wishing to move to a smaller property in order to release larger accommodation*
- (b) a person who currently lives in the Parish and has an appropriate housing need because their family size has increased*
- (c) a person who currently lives in the Parish and wishes to transfer to a similar sized property*
- (d) a person from the Parish who is subject to a planned management transfer based on medical grounds*
- (e) a person who has previously lived in the Parish for 5 or more years up to the age of 16*
- (f) the first period of occupancy in accordance with the above criteria to be for a minimum of three months thereafter occupation (subject to the same criteria) may be extended to the neighbouring parish of Clapham for a further three months. Thereafter, the property may be offered on the open market.*

The criteria (a) to (f) will apply strictly to Rural Exception Sites, in line with Arun District Council Housing policy, and will be applied to other sites where the updates to the survey of local housing demand provide evidence of unmet locally expressed need.

5.0 Neighbourhood Plan Policies: continued

HD2.1 Evidence gained through the Parish survey indicates a requirement for local homes to enable local people to stay in the village (see Evidence Base 41). Indeed the NPPF paras 184 and 185 allows neighbourhood plans to contain a distinct local approach to that set out in strategic policy and this is being used to try to ensure that the local community has the best possible chance to benefit from new affordable homes. ADC Housing Allocations Scheme PEC2 refers.

Justification: NPPF 6; Obj. 1

Policy HD3 Live/Work Units

Live/work units will be supported where the occupier or their family live and work in the unit and where the proposals comply with other Neighbourhood Plan policies and emerging National Park policies.

- HD3.1 It is recognised that live/work units are not the same use as home working from a spare room. Live/work units provide an opportunity for an individual or a family to carry on their trade or profession adjoining their home which might otherwise involve a significant amount of traveling beyond the Parish or giving up residency in the Parish.
- HD3.2 It is important however to ensure that the work activities are not of such a nature that they would adversely impact on the amenity of neighbours and the local community and consequently not all work activities will be acceptable.
- HD3.3 The relative scale of live/work units should relate to the built environment context or the rural edge landscape context of the specific location. The work unit part should be no greater than fifty per cent of the floor area of the residential part and the height of the work unit part no greater than 3.6 metres unless an acceptable case can be made for a greater area and height.

Justification: NPPF 6; Obj. 5

Policy HD4 Self Build Houses

Individual or small groups of self build houses, built for owner occupation, will be supported subject to compliance with other development plan policies.

- HD4.1 The NPPF recognises that there should be more opportunities for people to build individual houses, or groups of individuals to build small groups of houses in the UK and that local planning policy should encourage sites to be made available even as part of general need housing allocations, for self build houses.
- HD4.2 The SDNPA Initial Consultation Options showed a preferred option to make sites available for self build houses in the National Park within or on the edge of existing settlements.
- HD4.3 The Government has established a Custom Build programme which seeks to increase the level of self-build or custom-build schemes coming forward across the country.

5.0 Neighbourhood Plan Policies: continued

HD4.4 An individual or family, or group of individuals, friends or family commissioning an individual house design and arranging for a local builder to construct a new house(s) will be considered as self build where the individual, friends or family take on the project management role. A builder arranging for the design and constructing new houses to be sold 'off plan' will not be considered as self build.

Justification: NPPF 6; Obj. 5

Policy HD5 Alterations and Roof Extensions

Proposals to alter, extend, or raise the roof of bungalows will be supported provided that their design and scale are in keeping with the landscape and local character and that the impact on the amenity of surrounding properties in terms of siting, design and external appearance is acceptable.

HD5.1 Raising the roof of bungalows will generally be limited to forming 1 1/2 storey houses with individual dormers although in some cases it may be acceptable to form a part, two storey part 1 1/2 house. Where a full two storey or part two storey house is proposed the roof pitch shall be not more than 35 degrees to avoid an over high building form in these locations. Proposals for 1 1/2 storey houses may have roof pitches above 45 degrees to provide more useable floor space and encourage more variety in building form in these locations.

HD5.2 Extending roof spaces can provide additional affordable accommodation for the young and the elderly to remain in the family home.

Justification: NPPF 7; Obj. 2

HD6 See: Community Aspirations

5.0 Neighbourhood Plan Policies: continued

Policy HD7 Design of development

The design of development is encouraged to follow the guidance set out in the Findon Village Design Statement (see Appendix 5) which seeks to 'ensure that the valued physical qualities and characteristics of the village and its surroundings are conserved, protected or improved.' The use of local stone and flint will be encouraged.

- HD7.1 Findon village is a compact downland village. It has outlying settlements to the South and North. The hamlet of Nepcote is included within the settlement boundary but the hamlet of North End is excluded. It has mixed density housing of various architectural styles and periods ranging from medieval to modern traditional, all with attractive views and perspectives throughout. The design of any new development should be sensitive to the established characteristics of the built environment within and surrounding the Village.
- HD7.2 Policy G5.1 of the Findon Village Design Statement states 'The heritage architecture of the Village is characterised by the use of flint walls, local stone or tiles for roofs and the decorative oval 'Findon' windows in wood or metal. Current examples should be preserved and the use of such features in new builds encouraged.

Justification: NPPF 7; Obj. 3

Policy HD8 Outdoor space

Proposals for new housing development should include good quality outdoor amenity space - either private gardens or a shared amenity area. The amount of land used for garden or amenity space should be commensurate with the size and type of dwelling and the character of the area, and should be of appropriate utility (for play and recreation) and quality having regard to topography, shadowing (from buildings and landscape features) and privacy.

- HD8.1 Good quality outdoor space improves recreation opportunities for young and old, contributes to the open feel of the village and provides opportunities to increase biodiversity. It also largely reflects the current layout of the Parish.

Justification: NPPF 7; Obj. 3

5.0 Neighbourhood Plan Policies: continued

5.8 Supporting Evidence/Background Documents

The following were used in the creation of the Plan:

Supporting Evidence

Residents' Survey 2014
 Community Engagement Events 2014 and 2015
 Findon Listed Buildings
 Findon TPOs
 Action in Rural Sussex - Community Profile
 Natural England Designations
 Findon Conservation Area
 Findon Character and Heritage Report
 Findon Flooding and Drainage Report
 Findon Scheduled Monuments
 Housing Site Appraisal Report
 Landscape Character Assessment - David Hare
 Sussex Biodiversity Centre - Desktop Biodiversity Report
 Dept. of Transport Accident Reports 2005-2013

Background Documents

South Downs National Park Access Network and Accessible Natural Greenspace Study 2014
 South Downs National Park Management Plan
 Flood and Water Management Act (2010)
 Arun District Local Plan 2003
 Arun District Draft Local Plan (2011-2031)
 Arun District Strategic Housing Land Availability Assessment, SHLAA (2012)
 Arun District Housing Strategy 2010-15
 Arun Play Strategy 2011-16
 Arun DC Energy Efficiency and Fuel Poverty Strategy 2014-29
 Flood and Water Management Act (2010)
 National Planning Policy Framework (NPPF)
 ADC - SPD - Buildings or Structures of Character Adopted September 2005
 The Quiet Lanes and Home Zones (England) Regulations 2006

6.0 Community Aspirations

As a result of the examination of the Findon NDP a number of policies approved by the Parish Council were removed from the plan. The Parish Council consider it is important that these policies, representing the views of local people, are recorded and therefore these policies, which will now be community aspirations, will be placed in a supporting document entitled Community Aspirations. These community aspirations will guide the work of Findon Parish Council.

The community aspirations relate to the following issues:

- A24 Improvements
- Traffic management
- Gap between Settlements
- Spatial Plan of the Parish
- Edge of Boundary Houses and Paddocks

Findon Past

Appendix 1: Assets of Community Value - *Policy CFW5*

The Parish Council is proposing that the following buildings are assessed by Arun District Council for designation as Assets of Community Value as a result of their acknowledged importance to the life and enjoyment of the community

- 1. The Post Office /Village shop**
- 2. Peckhams Butchers**
- 3. The Village Hall**
- 4. The Gun Inn**
- 5. The Village House PH**
- 6. St John the Baptist C of E Primary School (including the Swimming Pool)**

The assets listed in this policy are all considered to meet the definition of the Act, i.e. that “a community asset is a local building or piece of land which the community considers furthers the social wellbeing interests of the Parish. Each community is free to decide for itself what it values.” All the assets selected are considered to be buildings and uses of some considerable longstanding in the local community and with which local people have a strong affinity.

The inclusion of these sites on the local planning authority’s register of Assets of Community Value will provide the Council or other community organisations within the Parish with an opportunity to bid to acquire on behalf of the local community the asset once placed of sale on the open market.

Appendix 2: Local Green Spaces - *Policy CFW6*

The NPPF para. 76 defines Local Green Space as:

The Local Green Space designation will not be appropriate for most green areas or open space.

The designation should only be used:

- where the green space is in reasonably close proximity to the community it serves;
- where the green area is demonstrably special to a local community and holds a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife;
- where the green area concerned is local in character and is not an extensive tract of land.

The phrase “local in character” is open to various interpretations. Here it is interpreted as meaning an area that is contained within clearly defined physical boundaries and occupies only a very small fraction of the total Neighbourhood Plan area.

The open rural aspect of the Parish and its fairly large land mass means that local people have suggested areas that are usually multifunctional, the reasons for nominating them being typically their use for social connectivity and events as well as their wildlife and beauty. Each piece of land was assessed using the following rating:

in close proximity	1
demonstrably special	2
beauty	3
historic significance	4
recreational value	5
tranquillity	6
richness of wildlife	7
local in character	8
extensive tract of land	R

Total cumulative amount of land proposed as Local Green Space = 4.46ha.

Represents 0.27% of the total Parish land area of 1614ha.

Appendix 2: Local Green Spaces: continued

1. Pond Green

A small green at the hub of the village which hosts local events such as country dancing and an Easter open air church service.

0.09 ha NPPF : 1,2,3,4,5,8

2. Homewood Green and Play Area

This space incorporates a children's playground and an area for dog walking and general exercise. Although not in the centre of the village, this is situated in a densely populated area and is well utilised .

0.31ha NPPF: 1,2,5,8

3. Cricket Field

The field used by Findon Cricket Club is situated on the edge of the village and offers panoramic views of the South Downs and wooded areas. Cricket matches are played here each weekend throughout the summer, when refreshment facilities are available.

2.11ha NPPF 1,2,3,4,5,8

4. St John the Baptist School Playing Field

The school field hosts several events each year including a Fete and Firework display. Findon Swimming Pool is located within this area. An outdoor heated pool, it is used extensively by residents throughout the summer.

0.68ha NPPF: 1,2,5,8

Appendix 2: Local Green Spaces: continued

5. The grassed area adjoining the Village Hall

This area is used extensively throughout the summer for flower shows and other outdoor events. It is also on occasions hired out, generating useful income to help maintain the village hall. It is a grassed area which is surrounded by well-established trees.

0.35ha **NPPF: 1,5,8**

6. Open areas at village entrances

The grass verges help maintain the character of the Parish. Each of the entrances to Findon has an open grassed area and there are several within the village. This is in keeping with the character of the Parish and provides an attractive introduction to visitors and maintains the rural aspect of the Parish.

0.21ha total **NPPF: 1,8**

7. The lane and public footpath from Findon Church to the High Street crossing the A24, forming part on the Monarch's Way

Apart from the historic significance of the Monarchs Way, which passes through Findon on its 615 mile journey, this lane provides pedestrian access from the Village to the Parish Church. It is also an area of beauty, lined on either side by a number a well established trees.

0.20ha **NPPF: 1,2,3,4,5,7,8**

8. The Sussex Twittens between Holmcroft Garden and High Street, Cross Lane and the High Street and Soldiers Field to Braeside Close

The Twitten is unique to the South of England and is described as a narrow path between two walls or hedges. In Findon these twittens help to provide safe access through the Parish.

0.10ha **NPPF: 1,2,4,5,8**

9. Footpath along Convent Garden/Nepcote Lane (signposted 'Private Footpath')

This path surrounded by a wooded area provides safe access where there is no public footpath.

0.41ha **NPPF: 1,2,5,8**

Appendix 3: Local Open Space

The following areas are considered to be Local Open Spaces. They each contribute to the open feel of the Parish and are places valued by residents.

Open Space is defined as land laid out as a public garden or used for purposes of public recreation.

1. The green area at The Oval

This is an area of communal grassland surrounded by houses which provides a vista for residents with unrestricted views across the local countryside.

2. Small grassed area on the east side of Horsham Road

This is an area of communal grassland with a bench.

3. The green area at Downview Road

This is an area of communal grassland surrounded by houses which provides a vista for residents with unrestricted views across the local countryside.

4. The green area at Horseshoe Close

This is an area of communal grassland surrounded by houses which provides a vista for residents.

Appendix 4: List of Flint Walls - Policy ES7

Location	Length Paces	Height Metres	Condition Good/Fair/Poor	Character Good/Fair/Poor
3 Steep Lane	2.50	1.50	Good	Good
3 Steep Lane	29.00	1.50 & dropping	Good	Good

14 ('Hill View Cottage')
St John the Baptist Primary School

SPD Criteria taken from ADC document

The Council will produce a Local List of Buildings of Character. The Council's criteria for selection of buildings or structures of character are as follows:-

- 1 Buildings of outstanding design, detailing, appearance or special interest because of the use of materials.
- 2 Buildings which are extremely good examples of traditional or established style, or of unusual type.
- 3 In special cases, buildings or structures which contribute towards the local townscape or have important historical associations.
- 4 All buildings must be largely intact and not adversely affected by later extensions or alterations.
- 5 Preferably, although not exclusively, they should make a positive contribution to their surroundings or the street scene
