

# Planning Committee Meeting

10 August 2017

## Agenda Item 14

### Review of East Sussex Joint Waste & Minerals Local Plan

# Review of East Sussex Joint Waste and Minerals Local Plan

- Joint project with East Sussex CC and Brighton & Hove CC
- The key issues for the SDNPA to address are:-
  1. Maintaining the 'Managed Retreat' strategy of planning for land-won minerals in Counties outside of the National Park; and
  2. Ensuring that mineral infrastructure e.g. wharves and railheads – including those outside the National Park – are suitably protected from inappropriate development.
- Sand and Gravel will be the mineral resource that will most likely need additional sites
- The regeneration of Newhaven – the only significant port in East Sussex – will likely provide the most challenges in terms of protecting infrastructure

# Recommendation

The Committee is recommended to:-

- Note the purpose and proposed timetable for the review of the Waste and Minerals Local Plan; and
- Note that a review will be initiated, to commence with a consultation inviting representations about its scope and a 'call for minerals sites'
