

Planning Committee Meeting

17 January 2019

Agenda Item 10

To update on the progress of the Single Issue Review (SIR) of the West Sussex and South Downs Joint Minerals Local Plan (JMLP) and the Regulation 18 Consultation

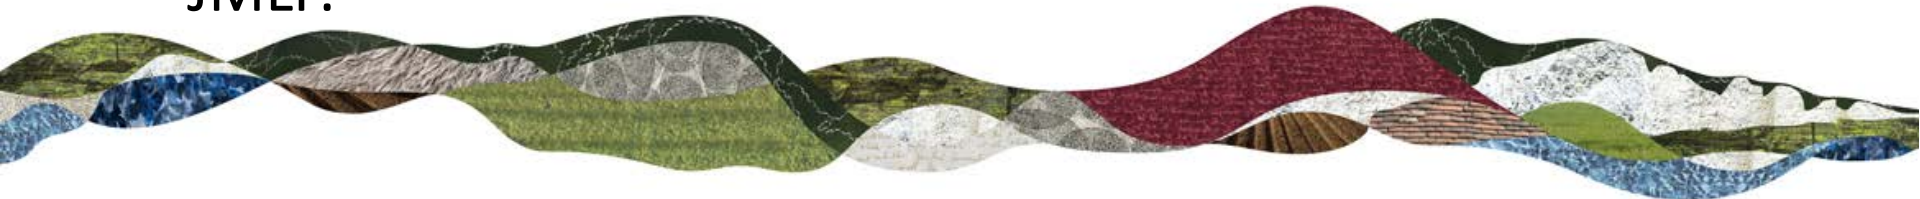

Background

- WSCC and SDNPA Joint Minerals Local Plan (JMLP) was adopted in July 2018 with a commitment to undertake a Single Issue Review (SIR) of the Soft Sand policy
- The SIR will follow the full Local Plan preparation and adoption process
- Once adopted, the SIR will form part of the JMLP

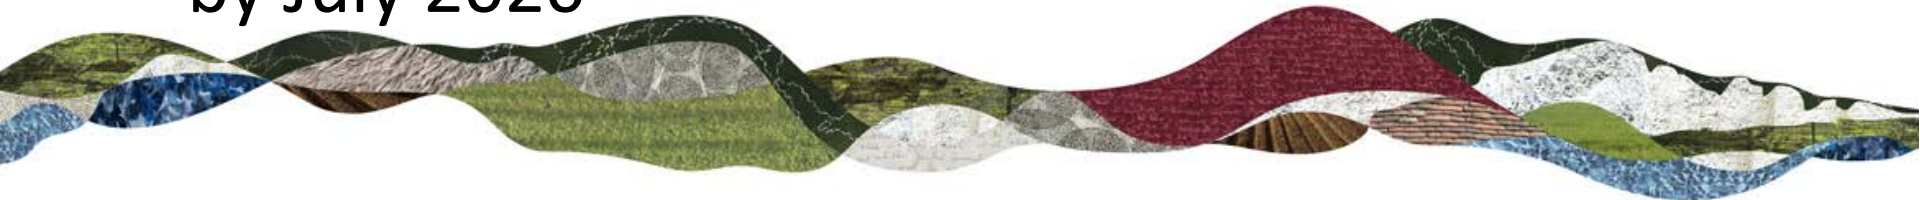

Issues

- The SIR considers the following three key issues, which are addressed in Chapters 2-4 of the consultation document:
- **Issue 1:** the identified need for soft sand during the period to 2033;
- **Issue 2:** the supply strategy, namely, the options that can, either singularly or in combination, be used to meet any identified shortfall; and
- **Issue 3:** the identification of potential sites and, if required, the selection of one or more of those sites to meet identified need.
- The SIR does not consider any other mineral planning issues or seek to make changes to any other parts of the JMLP.

Next Steps

- The Regulation 18 will run for eight weeks from 21 January to 15 March 2019
- Officers will prepare a Draft Plan document for Regulation 19 consultation in Late Summer 2019. Members will be able to contribute to policy formulation between now and early Summer.
- Following the Regulation 19 consultation, Officers will work towards adopting the SIR into the JMLP by July 2020

Recommendation

- The Committee is asked to note the progress of the JMLP Single issue Review and the Issues and Options Regulation 18 Consultation Document
