

## PMP Proposed Structure

### Foreword from Margaret

#### Introduction

What is a Management Plan

Who is it for?

How has it been developed (I would include as an appendix who we have worked with, consulted with to develop our priorities).

How will be monitor and judge its success?

**Long -term Vision** (broken down into the three main categories – as set out below)

**Achievements so far** (about 4 pages/2 spreads of what we achieved with the first Management Plan – or we could do it as a fold out so three pages across, nice and visual)

**What has changed in the outside world** (please let's not call them drivers for change) (a clear sharp two page spread with a paragraph each on 4-5 issues)

**What success will look like** – two page spread set out with very short vision and images of different areas and priority actions and where we want to be with them (not 100% sure yet where best to place this)
