

Education and Knowledge Management Zones

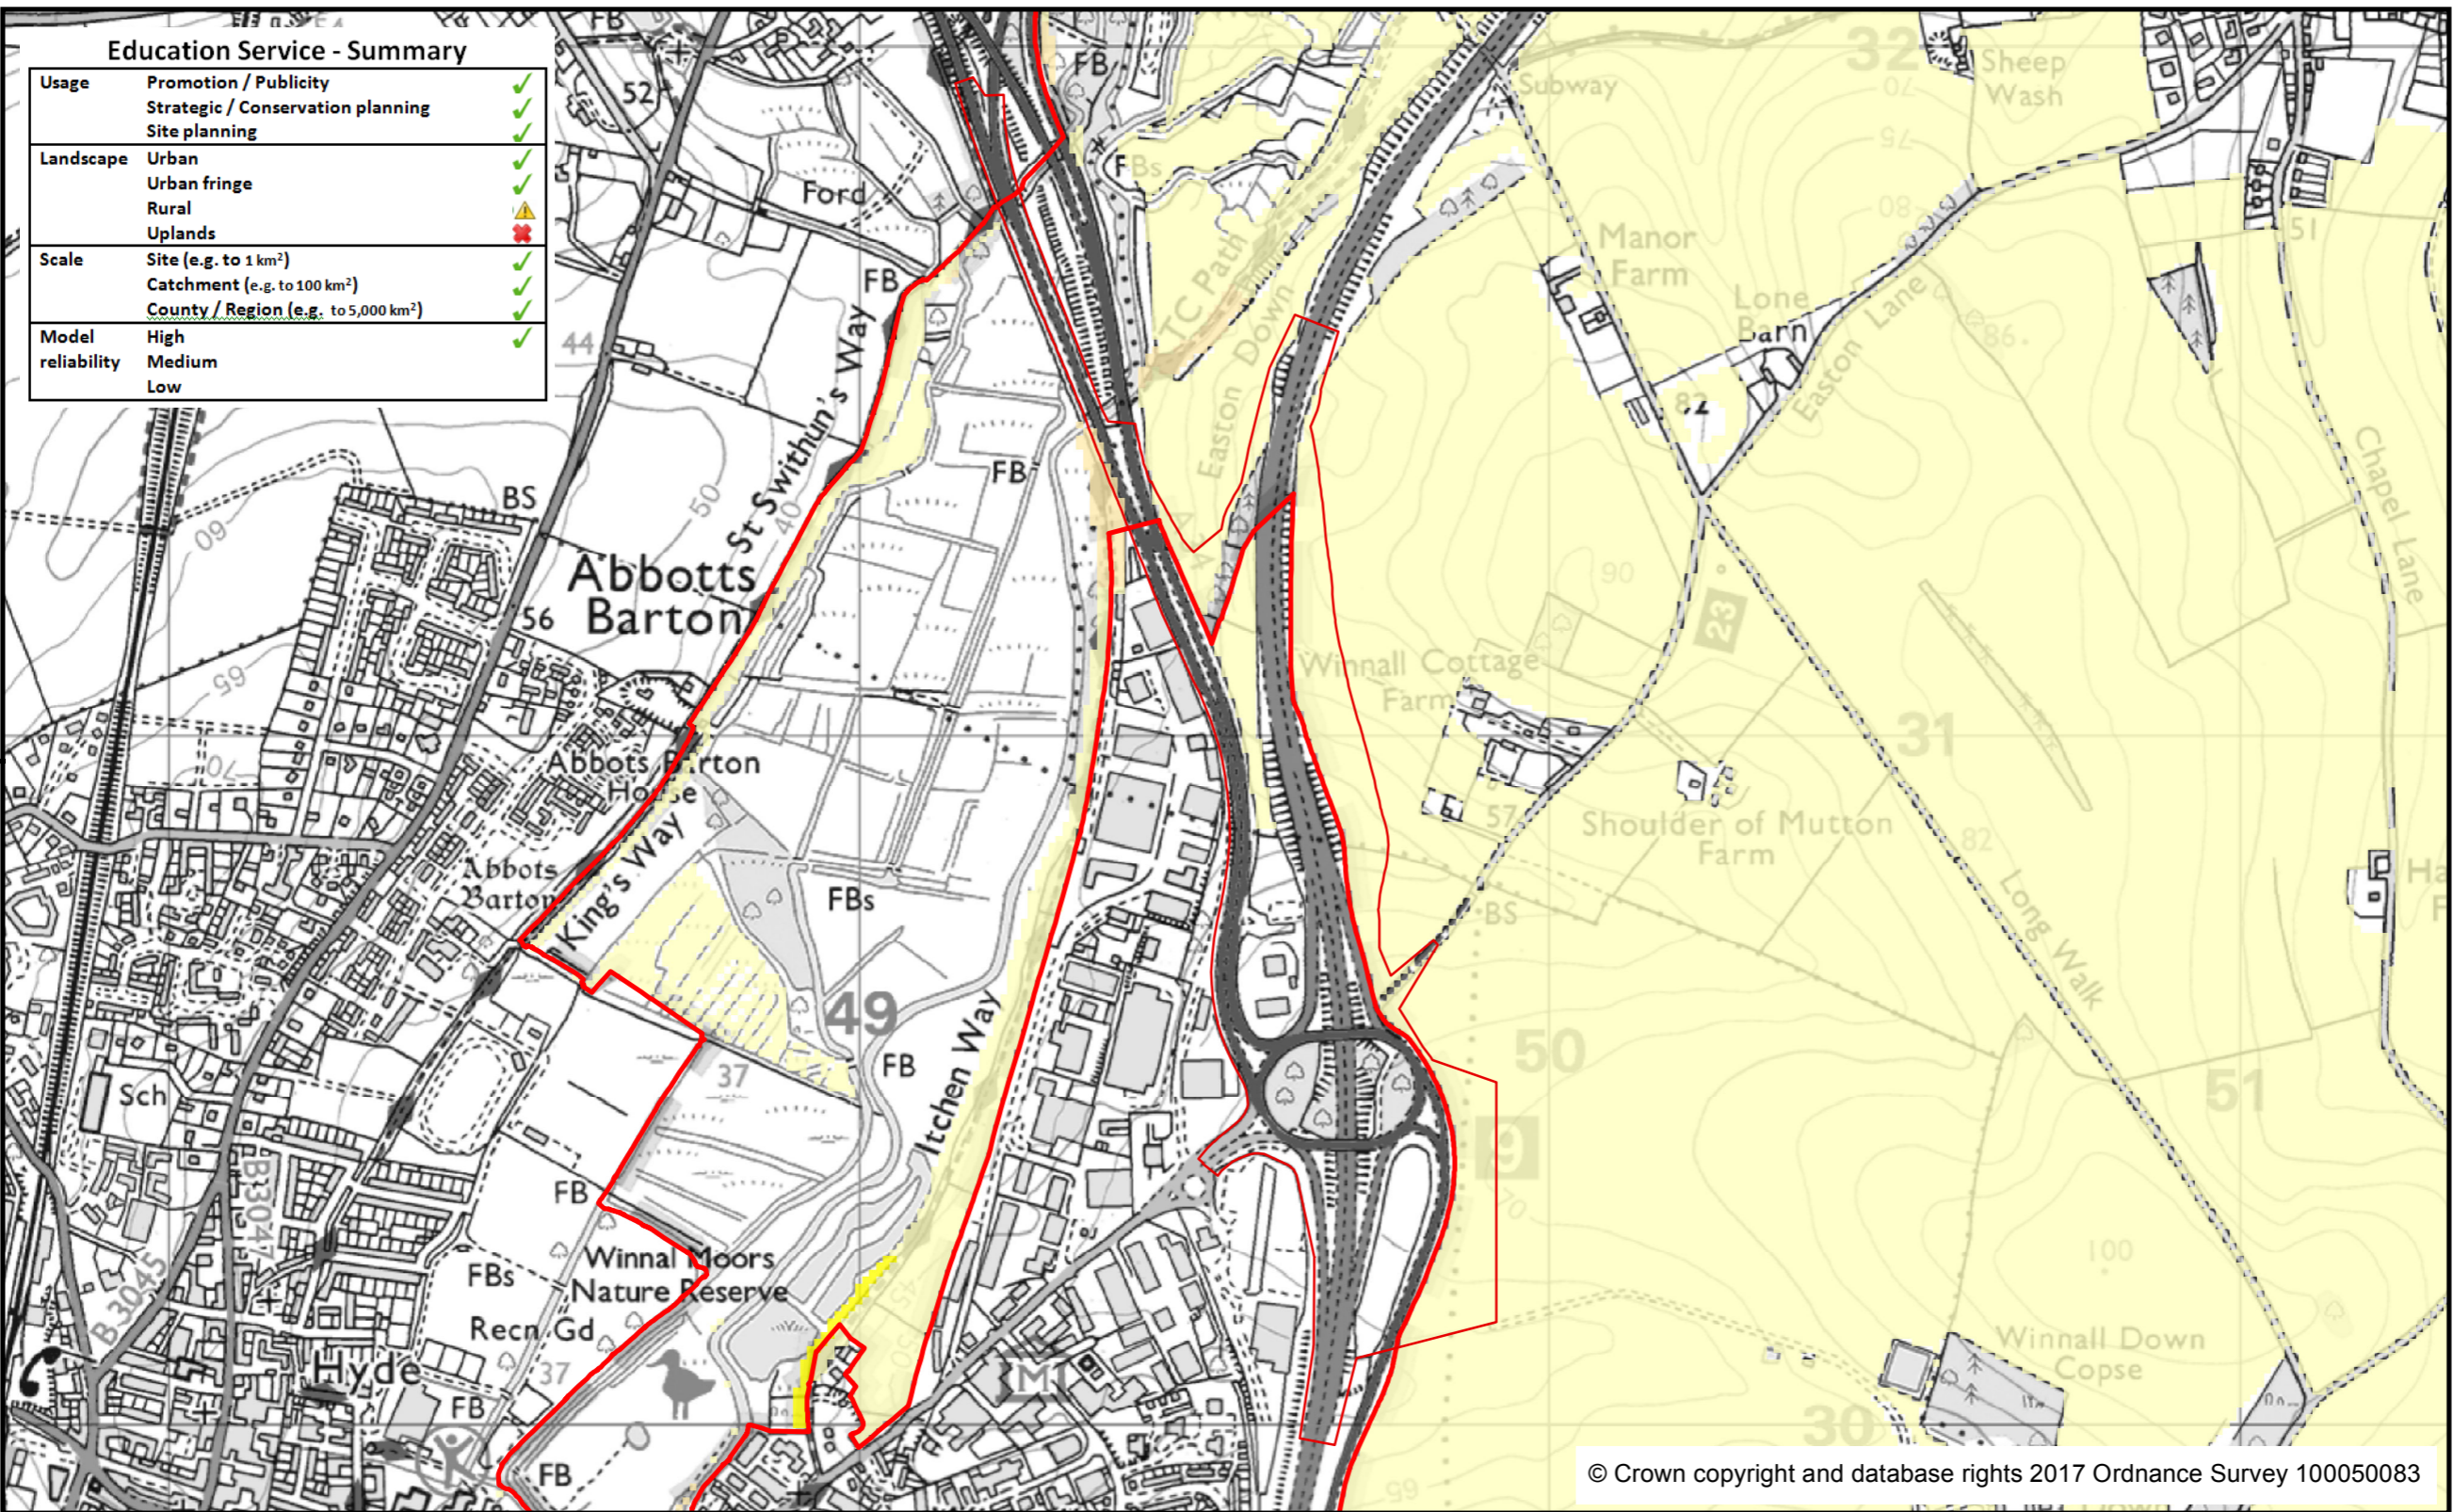

Suggested Management

- A1. Protect
- A2. Protect / Maintain
- A3. Maintain
- A4. Improve
- A5. Maintain / Improve
- A6. Maintain / Assess
- A7. Assess
- A8. Change habitat type: Highest Demand
- A9. Change habitat type: High Demand
- B1. Create: Highest Demand
- B2. Create: High Demand
- C1. Provide access: Highest Demand
- C2. Provide access: High Demand

 □ SDNPA boundary

The coloured graphic below the map illustrates how the capacity and demand maps are used to create this classification.

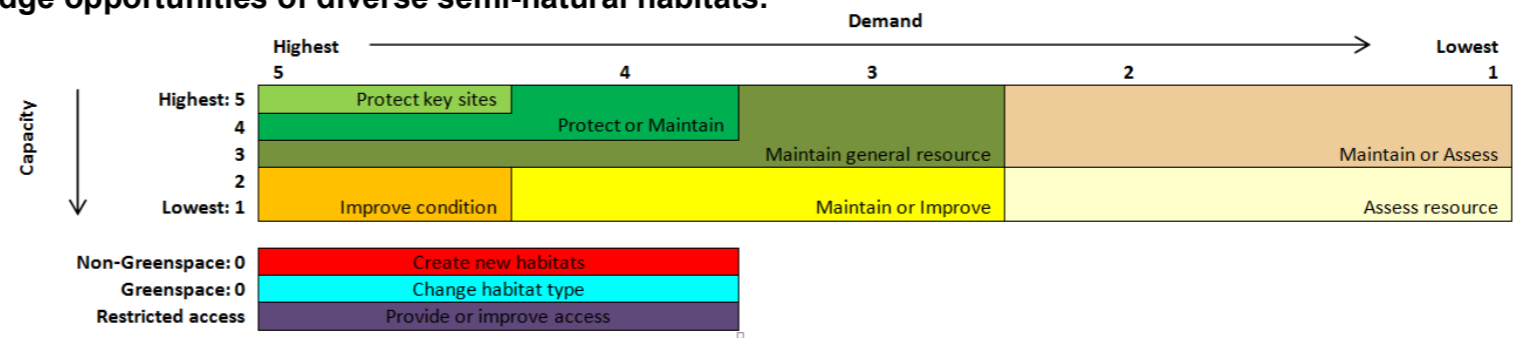

EcoServ-GIS models executed by Sussex Biodiversity Record Centre (hosted by Sussex Wildlife Trust).

Areas where young people can benefit from the education and knowledge opportunities of diverse semi-natural habitats.

METHODS: Capacity and Demand quintiles are overlaid to estimate the management interventions that could maintain or increase the benefits delivered to people. Not all categories are always present.

LIMITATIONS: EcoServ-GIS relies on indicators to predict levels of capacity and demand. Results are relative to the study area and cannot be compared to other areas. Local knowledge must be used to interpret what the values mean in absolute terms.
