Worthing	Ferring	West Sussex County Council	Bridleway creation from BW2135 to East of Castle Goring	Transport	£50,000	>£50,000	Long Term

APPENDIX C: PRIORITISATION OF INFRASTRUCTURE PROJECTS - PROCESS

The South Downs National Park Authority (SDNPA) is responsible for making the final decision on the allocation of funding raised through the Community Infrastructure Levy (CIL). This is achieved through an annual process of review, collection of bids and information and the preparation of a 5-year rolling programme of infrastructure projects – known as the Infrastructure Business Plan (IBP). This appendix sets out the decision-making process including how the SDNPA identifies and agrees priorities for the use of CIL and allocation of the funds.

Under the CIL Regulations¹, the SDNPA as the ‘charging authority’ is able to retain 5% of the money received to cover its administration costs, then 15% or 25% should be passed onto local Parish / Town Councils as the ‘neighbourhood portion’² (see **Table 1**).

Where the Parish / Town Council’s priorities are the same as those of the SDNPA, for example if they are agreed a new school or highway improvements are needed, the Parish / Town Council can agree that the SDNPA can keep all or part of their 15% or 25% to ensure maximum funding is available for that particular infrastructure priority.

In accordance with the CIL Regulations, the remaining CIL money (minus the administration costs and neighbourhood portion) must then be spent on infrastructure projects related to the SDNPA’s infrastructure needs.

TABLE 1 – HOW THE CIL NEIGHBOURHOOD PORTION IS CALCULATED

Parish / Town Council with a ‘made’ Neighbourhood Plan	25% of CIL receipts received as a result of development within the Parish / Town will be passed onto the Parish / Town Council
Parish / Town Council without a Neighbourhood Plan	15% of CIL receipts received as a result of development within the Parish / Town will be passed onto the Parish / Town Council. This 15% is also capped at £100 per existing dwelling
Non-parished areas	SDNPA will retain 15% and work with the community on spending the monies in those areas

Funds will be passed to the Parish / Town Council every 6 months – at the end of April and October.

¹ The Community Infrastructure Levy Regulations 2010 (as amended)

² In accordance with Regulation 59A of the Community Infrastructure Levy Regulations 2010 (as amended)

THE PROCESS FOR THE CREATION OF THE INFRASTRUCTURE BUSINESS PLAN

In summary, each year the SDNPA will have a ‘call for projects’, inviting local communities, service providers and other stakeholders to put forward projects for CIL funding (this call for projects will also include a review of existing information / evidence). Projects put forward for funding will then be assessed in three initial stages.

Step 1 – Basic Eligibility Test, when considering a project, the following questions will be asked:

- Is it infrastructure?
- Does it relate to and support the South Downs Local Plan and Neighbourhood Plans?
- If the answer is No to either of the above, then the project is not eligible for CIL funding. If the answer is Yes, then the project will move onto Step 2.

Step 2 – Category of Project, the SDNPA acknowledges that there will be a funding gap between the total cost of the infrastructure required and the money collected through CIL. Therefore, projects put forward for CIL funding will need to be prioritised (based on discussions with County Councils and other strategic infrastructure providers). Step 2 involves putting the projects into one of the following categories, as shown in **Table 2**.

TABLE 2 – CATEGORIES FOR PRIORITISING INFRASTRUCTURE PROJECTS

Type	Definition
Critical	Infrastructure that must happen to enable growth, i.e. is a pre-requisite to unlock any future works, without which the development can't proceed. These generally fall within S106 agreements
Essential	Necessary in order to mitigate impacts arising from the operation of the development i.e. off-site provision of school places, highway improvements.
High Policy Priority	To support wider strategic or site specific objectives, which are set out in policy or subject to Statutory Duty. The SDNPA will prioritise projects within or with clear links to: <ul style="list-style-type: none"> • Our 5 large Settlements areas • Neighbourhood Plans with development allocations • Development allocations within the Local Plan • Partnership Management Plan Priorities – with clear evidence of partnership working
Desirable	Required but unlikely to prevent development in short-medium term. This will also include projects linked to Neighbourhood Plans with no development allocations and Projects which fall within / close to Large Settlements / Neighbourhood Plans with allocations but the projects have no defined timescales / clear commitments (i.e. more aspirational).

Categorising projects is always going to involve an element of judgement and the category that a project falls within may change over time.

Step 3 – Scoring of Projects, projects will then be scored using the ‘Prioritisation Matrix’, see **Table 3**.

In addition, projects will be put into the following 5-year periods based upon when they would be most likely to be required or delivered:

- Short term (within 1 – 5 years);
- Medium term (6 -10 years), and
- Long term (11 – 15 years).

Where infrastructure providers, Parish / Town Council, local communities and others put projects forward for funding but do not provide a timescale, the SDNPA will identify them as ‘long term’.

The SDNPA will also identify those infrastructure projects where Parish / Town Councils could use their ‘neighbourhood portion’ to deliver the project. If they so wish to, Parish / Town Council can also request the SDNPA to retain all or part of their 15% or 25% to ensure maximum funding is available.

The SDNPA’s Major Projects Team (within the Planning Service) will carry out this initial work and create the draft IBP, including initial recommendations of which projects should receive CIL funding for that particular financial year based upon the categories, scoring matrix and funding available.

Once the draft IBP is created, extensive internal consultation will take place with the SDNPA’s Countryside and Policy Teams (CPM) and Senior Management Team (SMT), to see where they can ‘add value’ to projects, link projects together and confirm the prioritisation of projects, before it is recommended to the Planning Committee for approval.

The Infrastructure Business Plan (IBP), including which projects will receive funding (within that particular financial year) will be presented to Planning Committee for approval annually.

Once the IBP is approved, those projects that will be allocated funding that year will be subject to further detailed assessment.

Projects not allocated CIL funding for that particular financial year will be carried over and reviewed for the following year(s) Infrastructure Business Plan (as the IBP sets out a 5-year rolling programme of projects).

Table 3 – Prioritisation Matrix

Criterion	Tests	Assessment (1 to 10)	Weighting	Score
Strategic value	<p>The project supports Purposes and Duty, special qualities, Partnership Management Plan Outcomes and Policies.</p> <p><i>Weighting on landscape-led and ecosystems</i></p> <p><i>Need to understand if mild improvements for multiple purposes / special qualities outweighs strong improvement of one.</i></p> <p><i>If the project links to a variety and large number of outcomes and policies it should score highly.</i></p> <p><i>If the project completely delivers one policy or outcome it should score highly.</i></p>		10	0
Partnership working	<p>The project has been developed in collaboration with community-led plans, parish councils and other external partners.</p> <p><i>The number of partners is also an indicator that a project may score more highly but this should not be the determining factor.</i></p>		5	0
Relationship to Local Plan	<p>Scale of project, for example population served, area of coverage etc.</p> <p><i>Proximity to new development</i></p> <p><i>So growth-supporting infrastructure directly related to contributing site is highly rated</i></p> <p><i>Contribution to Ecosystems Services</i></p>		40	0
Value added	<p>Evidence of need for the project.</p> <p>Qualitative assessment:</p> <p><i>Has it followed best practice or exemplar projects for a higher-than-average outcome</i></p> <p><i>Has it followed guidance such as 'Roads in the South Downs' and landscape guidance</i></p> <p><i>Is there scope to link projects?</i></p>		10	0
Deliverability and resources	<p>Evidence that the project can be delivered with no major obstacles.</p> <p><i>Ownership by a suitable lead body.</i></p> <p><i>Availability of other funding sources, if appropriate.</i></p>		15	0
Urgency	<p>Linked to site-specific infrastructure needs.</p> <p><i>Could urgency or site-specific dependency override other considerations if it is critical to the delivery of a development?</i></p> <p><i>Can this relate to things such as imminent threat of loss of habitat?</i></p>		10	0

Criterion	Tests	Assessment (1 to 10)	Weighting	Score
Legacy	On-going management and financial stability of the project is sustainable. <i>Maintenance / operation / management costs are taken into account and long-term financial independence / profitability</i>		5	0
Risk	Risk – spreading <i>Availability of match-funding</i> <i>(higher the score, less risk attributed to project)</i>		5	0
